Stranded ship stripped by 'wreckers' after police guard is removed

There was confusion yesterday over whether "wreckers" should have been allowed on board the stranded cargo ship, Johanna, pictured above, which was stripped of almost anything that could be moved after it ran aground on the north Devon coast (Craig Seton writes).

More than 100 people, many from the nearby village of Hartland, climbed aboard the 960-ton vessel and carted away electronic equipment, freezers, washing machines, food, beer, doors, windows and even the captain's lavatory seat. It was their apparent belief that the ship had been abandoned. A local woman said they had been "like a load of vultures".

Police in Bideford nearby insisted last night that they had removed a police guard on the beached vessel after being told by Mr David Garrett, the Customs and Excise Receiver of Wrecks for north Devon, that it had been abandoned.

However, industry sources Eight in pay talks

Mr Garrett, however, said that the vessel had still been private property and it was the skipper's responsibility to secure the property on board. If the vessel had been left, he added, there was no doubt that it would have become a "wreck of the sea" and te prperty on board would have been destroyed.

He said that an offence would be committed under the Merchant Shipping Act, 1894, if people who had gone on board faled to declare to him what they had taken. So far, he said, he had received a few reports, "but it will be impossible to account for everything". Even so it was for the Department of Trade to initiate proceedings and not for the police.

Captain Adriaan Brockmeulen, aged 37, who it is believed, owns the Johanna in partnership with his father, was close to tears when he saw what the "wreckers" had done. The Johanna, went aground on New Year's

One of the first people on board over the weekend was Mr Clin Cotterell, from Bude in Cornwall, who said he had taken radio equipment which he had reported to Mr Garrett.

He said: "When they went aboard on Saturday it was a disaster. Hundreds of people were ripping and smashing things off and it got out of hand. They had not come equipped so they used anything they could find, iron bars, hammers or anything. That was the sickening part. Everything went. Kids were firing off fire extinguishers, a life raft was thrown overboard and a maroon was set off.

"It must have been heartbreaking for the captain to see his ship like that but the crux of the matter was why he was not there because as far as I know she had been declared a wreck," he added.

Science report

A pulsar that had observers in a spin

By the Staff of "Nature" a neutron star rotating an astonishing 642 times a sec-ond, have now reported in full while observatories around the world continue to examine the

Meanwhile, theorists have examined the implications of the discovery and are conclud-ing that it represents a new class of pulsar.

The patch of sky in which

object to see how its periodic

the pulsar was discovered had puzzled radio astronomers for some time. The patch appeared to contain a body of extremely small diameter, which produced a rapid increase in signal strength upon tuning the receiver from long to shorter wavelengths.

That is characteristic of pulsar. And yet the most obvious signature of pulsars, the extremely regular flashes that they produce at radio, optical and other wavelengths, usually many times a second

as missing. The problem, it is now clear, was the rapidity of the flashes. The fastest known pulsar until then had flashed at only about 30 times a second.

It was only when Dr D. Becker and colleagues, working at the Arecibo radio telescope in Puerto Rico, searched for very rapid twink-line in the circular produced by ling in the signal produced by the rarefied interstellar gas, that the new pulsar's 642 flashes per second

Conventional theories of the origin of pulsars indicate that they are the remnants of oding stars, or supernova. After a supernova explosion, much of the original star's gases are ejected in the form of a vast glowing cloud. The remaining gas collapses to form a dense and (in astrono-mical terms) tiny ball of neutron-matter, rotating at

high speed. Charged particles trapped in the neutron star's magnetic field emit beams of radiation by a process not well under-smod, and in the process the star loses energy, rotating at

progressively slower rates. On that theory, the more rapidly a pulsar spins, the younger it must be. Moreover, the star shoud be accompanied by the cloudy remnant from the supernova explosion, while electromagnetic and gravislowing the retation down comparatively rapidly.

The newly discovered pulsar fails to comply with these regulations. While spinning more rapidly, it is slowing down more gradually than any pulsar so far detected. Furthermore, there is no sign of the glowing supernova remant. Dr M. Ruderman and colleagues at Columbia University, New York, have suggested why that

They identify the millisecond pulsar as one of a new class which represents the end-point in evolution of a particular type of binary star system where most of the gas from one star gradually accretes on to the other (which has already become a neutron star) and in the process speeds up the rotation rate.

The neutron stars in those systems have comapratively weak magnetic fields; therefore the rate of "spin-down" due to electromagnetic processes will be slower than that of "conventional" pulsars. Observations reported by

Dr Becker and his colleagues and, more recently, by Dr A. Lyne, of Jodrell Bank, are consistent with the value of spin-down predicted by the theory, about one second every million million years.

acting as the first station in the centre, and is so discreet as to be SDP's rolling conference. almost invisible; none of the Considered in that light who would cavil? Yet, considered in the context that Cardiff is the capital of Wales, and that this was to be its premier hall, and thereby expressive of the cul-tural life of the nation, it barely merits modified enthusiasm.

It has been gained on the cheap. The hall is contingent on the shopping centre over which it stands and with which it shares several architectural features; that is hardly surpris-ing, as it shared the same London architect, J Seymour Harris Partnership; an architect so modest about his hall that he left the exhibition about the hall, inside the hall, to the

contractor, thus telling us very little about the design aims. To the Welsh the St David's Hall should rank, pro rata and milk machines and plastic food.

opulence visible even at somewhere as vulgar as the Usher or Albert Halls. It is a narrow hallway which rises through several levels, by lift or short-flight stairs, until one is clearly above the adjacent shopping complex.

Then the places get slightly more generous. For a 2,000-seat hall, however, they are poky. and in many places claustrophobic. There are a few balconies at different levels, each with room for fewer than ten tables. The tables inside are re-

moved during a full performance, since there is not enough space to allow people to sit down over their drinks or coffee: that gives the same away; the centre of the national culture with cheap and nasty

above or below to another, and the resultant feeling of opening out, of vista, and of spaciousness, the great, green, timber-framed window behind the piano dais: and, possibly, the piling up of short flights of differently-angled stairs. Those touches are nice; but

they do not excuse the overall conception. For those Welsh-men who feel that such a criticism is unjust, and that the hall does not represent culture on the cheap, there is one thing to do. Go to Nottingham, which also has just opened a building of that sort. It is the capital of no nation, but it has placed a higher priority on the cultural importance of the project.

Overseas selling prices Hall should rank, pro rata and milk machines and plastic food.

The hall itself is grand, and itself is grand, and should be wished success, of the authorities it ranked as an adjunct to a commercial development.

The entrance to the ball is at one extremity of the shopping of the shop

'Harassed' buskers to seek quiet life abroad

By a Staff Reporter

A small group of London buskers are to apply for political asylum in several European

countries as a protest against alleged police harassment.

Despite the wish of the Greater London Council to ease restrictions on street entertainment, the buskers claim, their lives have been made imposs-ible by continual arrests, and in some cases imprisonment for non-payment of fines.

Perhaps half a dozen enter-tainers are involved in the unprecedented applications, to The Netherlands, Belgium and Scandinavia, where busking is

encouraged.

The British practice is to allow police discretion in the interpretation of whether a busker, by encouraging a crowd to form, is contributing to an

obstruction of "free passage along the highway".

In other countries, where busking is discouraged spot fines tend to be levied in order to avoid the need for pros-

The dissedent buskers, as they describe themselves, claim that such would famous "pitch-es" as Leicester Square and even the venerable Lord Mustard's pitch, outside Harrods, have been made unworkable by

the police.
Two of the buskers, Mr Michael Kay (who performs as "Bongo Mike") and Mr Jeremy Helm, have prepared a 40-page statement in support of their application, to be made soon, for political asylum in Belgium. The document chronicles 16

years of alleged "blackmail and intimidation" by the police, and describes the two buskers as dissident artists who are treated as criminals in their own country".

In support of their appli-cation, Mr Kay and Mr Helm have registered in the Belgian cities of Liège and Antwerp as licensed "street musicians and cafe entertainer". Translated from the Flemish, the intinerant element in their official job description is described as

"round-walking".

It can hardly help their case in Britain that they call their act, a music and comedy routine reminiscent of Laurel and Hardy, "Gutter music by the

Dossers".
But their instinct for publicity is undeniably sound: another stunt, still in the early warning stage, is to make citizens' arrests of promotional "buskers" such as the Wimpy Beefeater in order to help the police to keep pedestrian traffic moving freely.

Presenting a brand new gardening magazine only Which? could publish.

See how Gardening from Which?can benefit you. Read the next 3 issues FREE!

The publishers of Which? present an informative new magazine, designed to help you make the most of your garden. Cantening from Which? appears ten times a year. It embraces all the main areas of interest to every gardener. And it's yours to try out, ABSOLUTELY FREE, for the next three

ALL-YEAR-ROUND GUIDANCE ON EVER ASPECT OF GARDEN CARE.

All the benefits you'd expect from Which?

Like Which?, Gardening selects an area of interest, buys goods anonymously, researches and tests them thoroughly and publishes findings in clear, comprehensive reports helping you buy carefully and economically. Like Which?, it employs the judgement and talent of experts. And like Which?, it is totally non-profitmaking: accepting no advertising and therefore pulling no punches when it comes to asse Gardening saves you money with cost-cutting tips and price-

comparing product surveys. It's probing - seeking new subjects of interest to gardeners and finding new angles on more familiar ones. And it's utterly objective: just as prepared to condemn faulty goods as to praise first rate

Packed with information every gardener could want

Gardening has been conceived to appeal to every kind of gardener. The next three issues are planned to include over 25 articles, including such wide-ranging features as lawnmower servicing, killing weeds, sweet peas, buving vegetable seeds, potatoes, rotary lawrumowers, sowing seeds under glass, lawn fertilizers, cauliflowers, herbs, composts, shrubs and conifers, and greenhouses. And Cardening is topical, bringing you special bumper issues full of relevant information at the times you need it most.

In short, Gardening is a practical publication, telling you how to buy wisely, and how to get the best possible results from your garden.

Read Gardening from Which? FREE for 3 issues! Try Gardening for yourself - FREE Just complete and return the outpon below and we'll send you, FREE and with no obligation on your part, the next three issues, plus our special issue containing reports on hedge-trimmers, using old growing bags, choosing roses, trees for small gardens, cultivators and pruning shrubs.

You can keep these magazines at no cost even if you decide you don't want to subscribe. If that's the case, simply write to us by 1st May 1983 to cancel your Banker's Order before it even goes to the bank. If you do want to go on receiving Gardening at a cost of £4.75 a quarter, you need do nothing more. We'll send the Banker's Order to your bank and your subscription will bring you each issue as it appears. Just return the coupon to: Cardening FREEPOST, Caxton Hill, Hertford SG13 8BR.

Cajolery and cunning led to house-building record

Secret Cabinet papers newly Mr Macmillan's programme Paymaster-General, urged that lan combined cajolery, threat and sheer political cunning in 1952 to push through the biggest public house-building programme in British history.

Mr Macmillan, backed by Sir

Mr Macmillan, backed by Sir

Mr Macmillan, backed by Sir

Winston Churchill, defeated the Exchequer and the Goverattempts by Mr R. A. Butler, the nor of the Bank of England Chancellor of the Exchequer, to floated a scheme, the External cut the housing programme for Sterling Plan, which would have conomic reasons and by Lord set sterling free and probably Woolton, the senior Conservalive, to cut it because huge ation of the pound. estates of Labour voters were

Mr Macmillan's success as Minister for Housing and Local Government in building some 230.000 houses in 1952, 260,000 in the following year and more than 300,000 in 1954 helped to propel him to the premiership after Sucz in 1957.

The Cabinet documents show Mr Macmillan to have despised the Bank of England and foreign speculators. He argued for full-blooded social and housing spending to reduce workingclass unrest.

But the archives show, too, that his political reputation was purchased at the cost of disrupting the balance of investment in the economy. Factory

released under the 30 year rule pre-empted available wood and the scheme be rejected. Among show how Mr Harold Macmil-steel.

Sir Donald: new freedom.

Sir Donald has a slow, dry Scottish delivery and picks his words as if drafting a com-munique. On the Falklands, the Government was right, he said, to react the way it did. "the invasion having taken place". A more immediate threat

than the "so-called arms race". he explained, was the increasing tendency of small and mediumsize powers to ignore the mandatory resolutions of the United Nations Security Coun- Department of Energy took cil, as Argentina had done. That Whitehall by surprise in 1980.

On Whitehall relations with Fleet Street, he recalled his days as Mr Edward Heath's press secretary: "I am not sure that been a member of the lobby finds the non-attributable mass briefing a satisfactory way of doing business".

The remedy, Sir Donald said, lay in more on-the-record press conferences and the publication of more background information about policy choices, before ministers made up their minds. He reckoned that Lord Franks's idea of a code of practice on open government, monitored by a special Commons select committee, might be the way forward.

Diplomacy and information policy lie in his recent past. But his most immediate preoccu-pation has been with fuel and power. His appointment to the permanent secretaryship at the

was "the road to international Sir Donald was very much Mrs anarchy". Margaret Thatcher's choice. Margaret Thatcher's choice. She regarded him as the bes negotiator she had encountered.

Sir Donald's stewardship saw the privatization of Britoil, big anyone who has been at the decisions on the future develop-Number 10 press office or has ment of a fast-breeder nuclear reactor, and endless complications over pit closures. But the memory he will leave in Millbank, where he was very popular with ministers and staff, is an open style which, as a colleague put it, 'made a very good impact on morale".

As for those electricity price they were, Sir Donald said, his most intractable problem. He predicted they will form the greatest headache for his successor, Sir Kenneth Couzens.

Treading delicately across a minefield of Scargills and industrial lobbyists, he said: "The problem can only be resolved by a process of advance on a wide range of fronts". No communiqué more polished or gave fewer hostages to fortune.

free transport for all, and no as the customers' interests.

redundancy for staff. It is an But perhaps the most imidealistic view of life that ant lesson is that in Ham unfortunately requires someone else to underwrite it.

The most striking lesson of Hamburg for London is the unremitting attention of the transport providers to the needs of their customers. Hamburg has an attractive, reliable, and reasonably cheap public transport system because those who provide it work ceaselessly at making it so.

Attention has already been drawn to the travelcard and inspector system, which reduces fraudulent travel to far below the London level. But it also has other advantages. It saves Hamburg the huge investment (estimated at more than £150m in London) of complex electronic barriers; and helped to cut staff by a third from 12,000

to 8,000 in a period when the service was expanding. In London, advances towards labour-saving methods have been frustrated for years by union resistance, reinforced now by County Hall, who will not countenance efficiency

measures by London Transport that "cost jobs".

Fisheries policy that pleases none and angers most

decade of British membership of the European Community. In the second of five articles by staff writers of The Times, John Young, Agriculture Correspondent, examines the effects of EEC membership on Britain's fishing industry. The series began on December 20.

While farmers are assumed to have done well out of EEC membership, Britain's fisherbadly. Their indignation touches a chord among the British public, which tends to regard farmers as greedy and queru-lous and fishermen as folk heroes, brave, resourceful, independent and our last line of defence against potential

The most emotive view is that these splendid men have been betrayed, that successive governments have sold out their interests. Not only that but, in return for the dubious advantages of EEC membership, we have handed over a rich national resource to be exploited by foreigners.

The plight in which the fishing industry finds itself today is due, as much as limit to those countries which policy is an irrelevance. anything else, to changes in eating habits, aided and abetted by poor and unimaginative marketing.
In the last few years hun-

dreds of fishmongers have gone out of business. Although fresh fish counters are beginning to make a welcome reappearance in some supermarkets, most of manufacturers of fish fingers and other such delicacies are happy to buy their raw material from Norway, Iceland or Canada, so long as the price is right.

The single most crippling blow to the industry, however, was the loss of the Icelandic fishing grounds, after the 1975 Cod War. That effectively

Prisoners

of conscience

destroyed the British distantwater fleets.

The extension of territorial limits to 200 miles, which followed loeland's unilateral action, brought more problems. For British fishermen it was unquestionably a bad deal, though in theory they now had the right to fish anywhere within the Community's 200-mile "box". However, nearly two-thirds of all the fish breed and swim in British coastal

The British fishermen were saved from the immediate threat of foreign vessels fishing. They believe, rightly of wrongly. "up to the beaches" by a that a resource has been temporary derogation restricts squandered, and that the muching licences within a 12-mile vaunted common fisheries. could claim so-called historic rights. They were also sustained by the promise of a common fisheries policy, the terms of which have now been rejected

by Denmark Fishermen's organizations in Britain were also dissatisfied with the terms of the policy. They had pressed for an exclusive 12-mile zone and a 45 per cent catch quota; instead, they would have only a 35 per cent quota, and historic rights would be enshrined in the

ahead on farm prices

From Ian Murray

Pitfalls

This season's EEC farm price negotiations promise to be slow and particularly tough after the European Commission suggested increases averaging only 4.4 per cent.

This falls well short of the 7 per cent being sought by farmers' organizations, who have shown over the years that they can effectively lobby both governments and the European Parliament, who between them will decide on the eventua

increase. But this time two other factors complicate the issue. One is the pending general election in West Germany. which assumes the presidency of the Council of Ministers on January 1. The other is the argument with the United states over EEC agricultural export subsidies, which would be bound to grow if even the modest proposals are accepted.

The Commission now unashamedly states that a number of its price increases are purely and simply designed to protect BRUSSELS: Mr Shintaro the incomes of Europe's farmembarrassing surplus, notably cereals, dairy and sugar and these are all areas of conflict with the US.

The Commission claims to be cutting these surpluses by holding back the level of increases for the products, but it seems certain that the United States will question whether enough is being done when it starts detailed studies with the Commission next month on how to head off the threatened transatiantic agricultural trade

The danger of a trade war in surplus dairy products is also creater now that it seems the Soviet Union is not prepared to buy any EEC butter until such

time as the price comes down. None the less, the Commission proposals would mean that dairy farmers would obtain average increases of 3.2 per cent, even after paying anoverproduction levy. French farmers would benefit by up to 7 per cent, however, because of promised green franc changes. What the proposals will mean

to the consumer is still far from clear. The Commission suggests average food price rises of 1.8 per cent in the Community, but for British shoppers only 0.6 per cent. This, however, would only be the case if Britain accepted a change in green pound rates, which would cut British farmers' increases by 2.3 per cent, something which Mr Peter Walker, the Agriculture Minis-ter, has rejected.

Denktas rejects **Kyprianou** friendship plea

Nicosia (Reuter) - Mr Rauf Denktas, the Turkish Cypriot leader, has rejected a new year assurance of friendship to his community from President Kyprianou, according to reports in the Turkish Cypriot press.
Mr Denktas, who heads the self-styled Turkish Federated

State of Cyprus was quoted in several papers as calling Mr Kyprianou's comments 'a new assault, a new insult to the Turkish Cypriot people."

In a broadcast new year message, President Kyprianou called the present situation of Turkish Cypriots that of "sec-ond class citizens accountable to the Turkish Army." He gave them "an assurance of friendship that the Government has their rights at heart and that all people living in Cyprus -Greeks, Turks, Armenians,

Maronites and Latins - are equal before the law." Mr Denktas said Mr Kyprianou was acting "as if there were a legitimate Greek Cypnor

prisons, abolishing the state security court for the summary trial of terrorists, and repealing Government in control of the the so-called Peyrefitte security whole of Cyprus and the law which had substantially Turkish Cypriots were one of increased police powers to the minorities under such a government"

West Germans prepare for tough election

From Michael Binyon, Bonn

President Karl Carstens will announce in a televised address on Friday his momentous and long-awaited decision whether or not to call a general election on March 6.

Despite his obvious doubts bout the constitutional legality of Dr Helmut Kohl's contrived oss of a parliamentary vote of confidence last month as a way of forcing new elections, the President, who will inform all party leaders of his decision inprivate talks tomorrow, is widely expected to agree to the unprecendented step.

West Germany's political

parties are getting ready for. what promises to be a tough election campaign.
The chancellor wants an

election now for several reasons: because on assuming office he promised a nation which was upset at being left out of the decision-making process a chance to ratify or reject the new coalition formed in parliament because he wants a mandate to carry through controversial policies of economic austerity and the station-ing of new missiles in Germany; and, most important, because he thinks the Christian Democratic Union (CDU) can win.

Two things, however, have recently dented the Govern-ment's condidence in an easy victory: the triumph of the Social Democrats (SPD) in the recent Hamburg election, and the latest opinion polls which predict a dismal defeat for the

Carstens: Important

decision tomorrow

On top of that, Mr Yuri Andropov's latest offer reduce the number of Soviet SS 20 missiles has brought the central issue of defence and missile deployment into the election in a way that is likely to help the Social Democrats.

in Hamburg the SPD recap-tured control of the city state with an absolute majority, sharply cutting back the CDU vote and reestablishing themselves in traditional

territory.

The result owes much to the skill of the Social Democratic

mayor, Herr Klaus von Dohna-nyi, the popularity and tough campaigning of Helmut Schmidt, the former chancellor, a native of Hamburg, and the determination of voters to end the city's shaky dependence on the votes of the unpredictable Greens - all local factors.

But Hamburg, the last test of electoral opinion before March, cannot be dismissed as untypical. National issues played an unusually large part in the campaign and voters, who turned out in record numbers, were clearly passing judgme on Dr Kohl's first 80 days

Hamburg also demonstrated what national opinion polls have recently confirmed – the continuing distillusion with the Free Democrats. The latest poll gives them 3 per cent of the vote, well below the minimum needed to capture seats

The SDP Has taken heart from Hamburg, Herr Hans-Jocheem Vogel, its candidate for Chancellor, announced over the weekend that he will visit Washington and Moscow in the next 10 days for talks with President Reagan and Mr Yuri

Though he specifically renounced any vote-catching publicity trips two months ago, his talks with Mr Andropov making him the first leading Western politician to see the new Soviet leader since the funeral of Mr Brezhnev - can only help his image here, especialy if he comes back with any further Soviet suggestions

Slow start for 'official' unions in Poland

Warsaw (Renter) - Poland's government-sponsored trade unions, set up after Solidarity was outlawed, began formally working yesterday with little interest from workers and a tentative approach from activists.

being formed initially only at the level of individual enter-prises, unlike Solidarity, which was organized on regional lines and attracted three out of every four workers in 16 months.

More than 2,500 unions have been registered, but only a small number of workers at any factory or company have so far involved themselves with the founding committees operating since a new labour code was adopted in October. "We are not conducting any

major recruitment and propa-ganda campaign. We want things to be as natural and normal as possible," said Mr Zbigniew Kowalski, the tempor-ary chairman of a committee at Warsaw's Huta Warszawa steelworks. He said about 300 of the

plant's 17,000 employees had involved themselves so far, and that it was not necessary for an overwhelming proportion of the workers to belong. "We Poles tend to think in terms of all or nothing - that is unhealthy and unnatural," he said.

the re-emergence of the kind of political challenge posed by Solidarity, have said national "If after a year we get 10 to 15 per cent of the workers to join then that will be a success." He conceded that there had union structures will be formed been abuse from some workers only gradually over three years.

Mr Lech Walsesa, the Solida-

rity leader, said he was not interested in joining the new unions. He believed only about 172 of the 17,000 employees at the Lenin shipyards, his old workplace and the cradle of Solidarity, had joined so far. Mr Walesa said hindering the

creation of new unions would be undemocratic. He would like to play some role in unions in the future "But the new unions in their present form do not interest me". Party members have apparently not taken a major role in the first phase of the unions, and many workers believe this is to counter fears

Argentina sticks to its guns on Falklands

Señor Juan Ramon Aguirre Lanari. Argentine's Foreign Minister, said over the weekend that his country would continue to demand "full and legitimate" sovereignty over the Falkland

In a televised address to mark the 150th anniversary of Britain's occupation of the islands, Senor Aguirre Lanari urged Britain to comply with the UN General Assembly resolution calling for renewed talks on the

"Illegal occupation may per-haps give the United Kingdom transitory control of the territory ... but it will never grant it the full and legitimate sovereignty our country will continue to demand in every inter-national forum."

He made only a brief reference to last year's war, started by Argentina's invasion of the islands "For our soldiers, the prom-

ise that they did not fight in vain, to our dead, the commitment that new generations of Argentines will be born not too far in the future in the land where they fell," he said.

On Sunday, a group of about 20 war veterans, former conscripts, marked the anniversary by singing the national anthem with their backs turned on the

They also chanted slogans against "Yankee and British imperialism" and the military that the party intends to exert a Government that led them to

Karamanlis chides **Papandreou** in public

From Mario Modiano

Latent disagreements have iddenly surfaced between President Karamanlis and Mr Andreas Papandreon, the Prime Minister, over the Government's handling of crucial domestic and foreign issues.

Mr Karamanlis, in an unusually candid new year mess age to the people, urged the Government more or less to brush aside ideological constraints and show greater realism in tackling the problems with Turkey and dealing with the stagnant economy.

'Above all', he said, "we

there be no mistake. If our dispute with Turkey is pro-longed unduly, it may develop national wage agreement negointo a painful adventure for tiations with employers' organi-

both our peoples".

London's traffic is a mess. And we all know it!

- Our roads are snarled up and they're not getting any better.
- ares on our buses and tubes are the highest in the world yet the services are going rapidly downhill.
- Much of London Transport's system needs modernising but the money's just not there.

We've seen that increased fares drive passengers away - and fewer passengers pay even higher fares for a worsening service.

Obviously something must be done to put things right. London needs, and deserves, a lasting solution to its transport needs.

WHAT IS NEEDED?

The GLC is responsible for London's transport. We've first-hand knowledge and experience of the capital's transport problems.

- London needs a better bus and tube service at prices that Londoners can afford.
- London needs more jobs and cheaper fares would attract more business back into town.
- London Transport services need the same subsidies as local British Rail services - then we'd have uniform fares for all
- London needs to reduce accidents, pollution and traffic congestion - which would happen if people returned to public transport.

HOW WOULD WE DO IT?

The GLC has a 'Balanced Plan' which we consider conforms with our statutory duties and those of London Transport. And these are some of the benefits as we see it:

- it would be a move towards the integration and simplification of. public transport in London
- it would improve efficiency
- it would result in future savings
- it would see an end to the unacceptable cycle of higher fares/fewer passengers
- it would give London Transport the stability and some of the money it needs to modernise

it provides for a reduction of fares costing the same as an average 25% fares cut and an increased use of London Transport.

We believe that this would go a long way towards meeting London's transport needs. And it reflects our determination to keep the best interests of the ratepayers to the fore.

WHAT ABOUT THE GOVERNMENT?

The Government also has ideas. They were outlined in the White Paper on the same day that a new Transport Bill was published. Both show that the Government simply doesn't understand what London's real transport problems, let alone needs, are.

But how could they, considering how fast they're pushing their proposals through?

Their proposals do give provisional guidelines for public transport subsidies - but they're based on a number of serious misconceptions. A system based on these guidelines would not allow the desired simplification and integration which could only be achieved by a reduction in fares.

WHAT DO LONDONERS THEMSELVES SAY?

A recent independent survey showed that a majority of those interviewed thought that more subsidy - resulting in lower fares - should be found for London Transport. The present subsidy is about 27% while most other cities in the world average something like 50%.

In fact central Government only contributes 3% to the running of London Transport - the rest comes from London's ratepayers and

The figures speak for themselves.

We believe:

- the Transport Bill and provisional guidance do not recognise London's problems and needs.
- if we were to follow the Government's guidelines the whole public transport system would continue to decline.

We believe that these are matters that should not be decided by central Government but by those elected by Londoners to speak for London as a whole. That is what we understand by local democracy - and that is what is under attack.

IF YOU AGREE please send the attached coupon to your MP or, better still, write asking him or her to oppose the Transport Bill.

Lebanon and Israel still wrangle about agenda

attempts to reach agreement on a formal agenda for the new countries which continued yes-terday with American partici-pation in the battered Lebanese town of Khalde.

The third round of negotiations inside a week broke up with no agreement on the crucial agenda, and attempts to find a way around this formidable sticking point will resume on Thursday at Kiryat Shmona in northern Israel.

The continuing differences between Lebanon's desire to concentrate on troop with-drawal and Israel's wish for an agreement approaching a de facto peace treaty have confirmed predictions that the talks are likely to be tough, complex,

and protracted.

A determined effort to solve the agenda problem was made before the opening of yesterday's plenary sessions in the heavily guarded Lebanon Beach Hotel, when the three delegation heads met for nearly three hours in private session, designed to overcome the

Despite the disagreements, which have so far resisted American diplomatic moves to break the deadlock, Mr Antoine Fattal, the chief Lebanese negotiator, was quoted as acknowledging that Israel had

discussions.
One possible compromise is an interim troop withdrawal by both Israel and Syria, plus an almost complete evacuation of Palestinian guerrillas, combined with an understanding that political talks on future reations will be held later.

The Begin Government's insistence on pormalization being included as a central topic has already provoked internal criticism in Israil, where there is widespread public support for bringing home the troops.

A strongly worded editorial in yesterday's Jerusalem Post says: "By pursuing the will o' the wisp of full normalization, this country may only be getting itself bogged down in a procedural wrangle that would impede its disengagement from Lebanon."

هكذامن رالإمل

See what they're teaching our kids these days.

At the moment there are over 25,000 microcomputers in British schools.

Under the current DOI subsidised scheme, that number is set to increase and it is reckoned that within two years virtually every child at school will have regular daily access to a microcomputer.

How they use the computer, and how it can help in their education and development is, naturally, of considerable interest to every parent.

But how can the layman begin to understand this new technology?

To meet this need is the main aim of the BBC's massive Computer Literacy Project, which includes courses, books, software and a number of major television series.

A new series starts very soon, and it would be very useful to have, or have access to a microcomputer in order to make the most of it.

Now this is not as daunting as it

sounds. The BBC Microcomputer—one of the principal machines used in the series—actually costs less than most video recorders. (You can get a BBC Micro for as little as £299.)

It is light, compact, and as you will see, easy to use. It plugs into your TV, and has a wide range of programs including computer games. It has a real typewriter keyboard, and can, with a special adaptor, take computer programs straight from BBC's Ceefax service. These will start in March.

It is also most likely the computer your children will be familiar with at school – over 75% of machines now being ordered under the DOI scheme are BBC Micros.

If you would like to have details of where you can buy one to use with the series, telephone 01-200 0200.

Or, for more information, send a stamped addressed envelope to PO Box 7, London W3 6XJ.

The BBC Microcomputer System.

Riverside Studios

Per Kirkeby

Nigel Greenwood

Chris Baker

Warwick Arts Trust

Though we tend to rattle on about the universality of Shakespeare, we often take it amiss if some foreigner dares to bring us his own interpretation. It may be very interesting, of course, but all too frequently we measure it largely in terms of its wrongness, ie., its distance from the way that any true-born Englishman would be likely to see the same subject. It would be advisable for anyone who thinks like that to steer clear of Riverside Studios until January 23, unless he wants his ideas radically and permanently changed. Specifically, on *The Temposis* at any rate, if he has begun to be softened up by Nureyev's bailet version, he may be partially prepared for the savage splendour of Matta's views on the subject, but even so they are likely to come as a grave shock to the system.

Salutary, though. What we have here is a collection of more than 20 large-scale works in pastel on paper. or sometimes canvas, under the general title Storming the Tempest. The image, as of a citadel which has to be fiercely attacked in order to give up its secrets, is startingly apt. If we think of The Tempest primarily as a late Shakespearian romance, a fairly comfortable play which, though it has its difficult bits along the way, is predestined to end up in forgiveness and reconciliation, then we could well have difficulty in even recognizing the literary base of the drawings we see here, unless forewarned. These are images of devasting candour, summoning up a dark world of ritual. cruelty and violence. Not even a version of these qualities which has much to do with England: the most evident connexions are with the Pre-Colombian art of Mexico.

For example, the drawing (one of the largest) entitled The Realm of Sycorax, which depicts one man being slow-roasted over the flames while a blindfold female figure with a Hi grinning skull on her head prepares to wield are and spear in some kind of Aztec sacrifice. And what does that

Key work in Matta's vision: "The Realm of Sycorax'

have to do with the play? Not very much, one might say, since Sycorax and her cruelties have been banished from the island before the play starts. And yet this seems to be a key work in Matta's vision. Prospero's rule is scarcely better, and the quotations which are attached to the other drawings in the show all serve to remind us how much violent imagery. how many curses and threats of dire punishment there are in the text.

So, this is not a "balanced" view. But why should it be? Every artist, after all, takes what he needs from his source material, or responds to what he responds to. In a quite unexpected way Matta seems to have found in Tenipest a subject which focuses a lot of his past career into one powerful statement. The surrealistic "auto-matic drawing" style of the late Thirties in Paris, the connexions with the New York Abstract Expressionists in the Forties (before, of course, they were properly speaking Abstract Expressionists), the studies of Mexican art, the postwar residence in Europe and latterly Britain, even the

strange (and not very appealing), nebular swirls he has been painting in the last few years (as in the New Spirit show at the Academy), all fuse together here with a force and vitality amazing for an artist in his seventies.

The earliest works in this show (or so one would guess from internal evidence) begin with the nebular swirls, appropriately enough for instant images of *The Tempest* and of *Ariel*. But then the powerfully defined forms which seemed to be wrapped in and concealed by the swirling lines emerge, and we enter Matta's own world. It is tempting to call his work here symbolic, but finally it is nothing so indirect. Characters and events are simply reduced to their prime constituent. The Master of the Ship (in the storm) is reduced to a shouting mouth, Stephano to a gobbling mouth, Trinculo to a giant phallus. Caliban, whenever he appears, is a lesser Mexican god, Ariel a manylimbed harpy, even when he is not pretending to be one. Prospero's threats of punishment to Ariel come out as The Devoured, in which a skull has just snapped its jaws shut on a helpless human head. There is little on this island which gives delight and hurts not, though *The Banquet* is, appropriately calm after the storm. As a whole, the show has the extraordinary effect of modifying our attitudes in two different ways: after it, neither The Tempest nor Matta will ever seem the same again.

Another painter included in the New Spirit in Painting show (and in Zeitgeist in Berlin), Per Kirkeby, now gets his first one-man show in London at Nigel Greenwood, 41 Sloane Gardens, until January 22. Kirkeby is rather more inclined to abstraction than most of this group (as we have come, willy-nilly if not always appropriately, to think of them). But it is the kind of abstraction which very clearly has some sort of representational base - mostly, one would imagine, in landscape, though the gallery has a theory that the recent pregnancy of his wife, whose name he has given to one of his usually untitled pictures, may have something to do

with the appearance of noticeably more rounded forms in the paintings

But, in the main, the paintings would fit well into the last-but-one Hayward Annual, the one selected by John Hoyland to illustrate this idea of landscape floating somehow just beyond definition in the work of a number of British painters. Kirkeby is Danish, and belongs in many ways to a distinct Northern Expressionist tradition, as well as being (no doubt relevantly) a trained geologist who has taken part as such in many scientific expeditions. Inside his dark-toned paintings we may gather hints of cave-forms, ravines and maybe stark, northern forests. Still-lifes might also be imagined; though whether the gallery handour's reference to tabletops, candles and skulls is based on inside information I do not know certainly one could be forgiven for not seeing anything so specific. Nor may these rather unyielding works be to everyone's taste; but clearly Kirkeby

is a figure to be reckoned with.

At the Warwick Arts Trust in
Warwick Square until January 15 is a
new English abstraction-ist of more than usual-interest. It seems a bit odd to be discovering a painter in his first show at the age of 38 - particularly these days when just about everybody seems to be picked up and displayed almost before he (or she) has left art-school. But it seems that Chris Baker comes of an entirely non-artistic background and was working as a garage mechanic for some years before he even realized the possibility that he might become an artist. However, he has clearly made up for lost time now.

His paintings are not easy to describe: that is one of their great advantages. The general effect is abstract, but there is always a sense of space in them: again, they would have looked at home in the Hayward Annual of 1981. They are mostly in cold blues and greys, and most of them have titles which seem to link them explicitly to landscape (Arena, Paris) or to details of a building or interior (Vent, Crack). Certainly, in its geometrical elements as well as in its colour-range, this seems to be a manmade world, very definitely urban. In fact, if one finally thinks of any other painter, it is of Diebenkorn with his endless series of geometrical reflections on the townscape of Ocean. Park, California. The resemblance is fleeting and coincidental, but it possibly provides a clue to the procedures of this fascinating and distinctive Britan II we have been distinctive Briton. If we have been late to hear the first of him, we shall clearly not hear the last for a very long-

Martin Best

'Ariel's Songs of Renewal and Rebirth" made a nice welcome for the medieval singer, music to the new year and the old was but an intensification of newspaper, but Martin Best's own folksy declamatory settings were a strange upbeat to this largely medieval programme.

Best varies his voice attractively, but I always preferred the strong, rather nasal edgings that the adopted in the bleaker in an evening he is happy to veer from serious old French to numbers (especially Coinci's superb "Ja pour Iver") than the cheerful modern Spanish, from the intensity of the troubedours to the light-heartedness of his own special favourite eighteenth-century singer, the Swede, Carl Mikael Bellman, who provided the last group of the

evening.
In the best troubadour tradition, or perhaps in the Best troubadour tradition, every song is recreated, remade anew without too much worry about its original form. The pilgrim songs of the Llibre Vermeill, set recast as solo pieces with a somewhat anachronistic lute; hymns of Glautier de Coinci (more of which can be heard in a couple of weeks on Radio 3 in the new series Lost and Found) are torn from the context of the spoken narrative that surrounds

Theatre

Le Cirque imaginaire

Bloomsbury

As their act consists of dumpi superfluous cargo and creating a show out of thin air, I was alarmed to read that Jean-Baptiste Thiérrée and Victoria Chaplin had enlarged their twoartist circus with two ducks, eight doves, a toucan and the first French owl to appear on the British stage.

This supporting company is kept well in line, I am glad to say. True, the first half ends with a rabbit and a duck energetically upstaging each other, and the doves momentarily look like taking over when they make their entrance through an exploded balloon. But the flesh and blood animals are no match for the imaginary zoo that Thierree and Chaplin conjure out of paper, fabric and gesture: invisible fish, walking suitcases, crows that turn into unicorns, silver monsters on stilts and exquisite dream creatures, part insects part birds, that take shape from fans and umbrellas to transform the Bloomsbury stage into a para-

dise garden.

The evening begins with
Thierree stripping off three
masks and then beaming at us with what may be yet another mask. He then pulls on his partner as an apparently legiess automaton, revolving as if by clockwork. That defines their relationship. Working straight to the house, Thiérrée is a picture of warm-hearted benevolence, creeping on with the latest magic suitcase under his arm, showing us how his tricks work and sometimes making a mess of them. But, in company with Chaplin, a fanatical light comes into his eyes and he becomes the Doctor Miracle to her Doll. Only Thierree speaks, only Chaplin takes physical risks, dancing a jig on the high wire or climbing a rope trapeze to dive out into space, anchoring herself at the last split-second with an extended foot.

It is with her that he performs the main tricks of the evening: sawing ber in half and lifting out a section of the box to display her dismembered torso; or hypnotizing her on a table which he then removes leaving her rigidly levitated four feet above the stage floor. The atmosphere of the show, as always, is gentle and delicate; but inside that charmed circle Chaplin projects the submissive apprehension of a tragic clown, a neat, athletic body terminating in a Petrushka-like facial mask from which she only escapes by winding a fan into a crest or a tail and vanishing into the dream landscape.

Irving Wardle

The actress who appeared in the scene from Tom Stoppard's The Real Thing, illustrated on this page yesterday, was Polly Adams, not Polly James.

Opera Mocking and seductive

Grand Théâtre, Geneva

One of the best pantomimes available at Christmas had to be Offenbach's La Périchole at the Grand Théatre, Geneva, It has been served up by the French director Jerome Savary, effervescent, multi-coloured apart from the gags which tend to shades of blue, and in perpetual motion. Savary in Britain is known primarily for his company Le Grand Magic Circus, "avec ses animaux tristes", although its eccentricities have never looked quite so convincing when transplanted to London as they do at home in Paris. On the continent, though, Savary has a considerable reputation as an Offenbach director: La Vie la lune in West and East Germany respectively, a forth-coming La Belle Helène at the Opéra-Comique in Paris, and now Le Périchole, which he previously staged with considerable success in Ham-

It is simple enough to see why Savary is drawn to Offenbach. Both trade in mockery, especially the musienergy which never leaves their audiences in peace. Others may have their mauvais quarts d'heures; Offenbach in Savary's hands is not allowed more than a couple of bad minutes before a new joke is introduced to bring the theatre back to

reckoned to be the "softest" of Offenbach's operettas because of the love of the two strolling ingers, Piquillo and Périchole herself, and the sweetness of the most famous number in the parody of the Three Ladies in score, the "Air de la Lettre"

The Magic Flute and makes it which Périchole sings when she Clear that their interest in Distuits in their interest in Distuits in their interest in Distuits in their interest in the control of the co agrees to be a lady-in-waiting at the court of the Viceroy of Peru in return for a crust of bread, Savary will have none of that, for he knows full well that the apparently quite content with crust of bread turns into a drunken dinner and leads poodle and a boxer. directly to the second most celebrated song "Ah! quel minstrels. Neil Rosenshein, diner", in the Scene de la heard not so long ago in Scottish griserie. And so he goes for pantomime rather than senti-

Lingerie Fashion by Suzy Menkes

CHARLOTTE HILTON

"Lingerie must be sexy, but without being smutty. I try to cover where I can and show where I can," says Charlotte Hilton, whose elegant and exquisitely made Finewear creations are sold to the double cream of lingerie departments: The White House, Fortnian and Mason, Harrods.

Charlotte Hilton claims to have spent "a lifetime" in the lingeric business, since she came to Britain from Germany with her husband in the 1930s. She starts designing from the feel of the fabrics, bought mostly on the Continent by her daughter Monica. Everything is draped and pinned on a mannequin ("lit is most important") and the comments are mostly cut on the bias with pinned on a mannequin ("fit is most important") and the garments are mostly cut on the biss, with delicate tucking and shaping and a refined use of lace at the side-slit of a silk nightic or on the edge of a neat jacket (a newer accompaniment to a nightdress than the full-length negligee).

"We are going back to romantic lingeric because clothes on the top are so severe," says Charlotte Hilton, "And England is the leader. I used to go to France to buy models. Now I sell mine to Paris."

A massive 85 per cent of her business is now export, with the wealthy Saudi Arabians increasingly important, especially as they are prepared to pay for the perfection of fine workmanship and the best Swiss lace.

The problem now is that labour is so expensive, says Mrs Hilton. "I have been asked to design for America, but I am not prepared to have things made under licence with puckers in the seam. I wouldn't give my name to it.

Charlotte Hilton: "Women want to put on something easy and pleasing." Deep violet poly satin rightdress with lace insert and matching jacket (not shown).

By Charlotte Hilton in pink; pale green and white, £185.50 the set from Rose Lewis; Knightsbridge, SW1.

JANET REGER

never set out to design sexy underwear. I just try to make things that I think are beautiful," says Janet Reger, who takes the credit for the fact that Marks & Spencer introduced French knickers

among their bikini briefs.

"When I set up in business 15 years ago, the only underwear trend was for bras and briefs," she says. "I reintroduced the idea that lingerie should be a pleasure. But I still don't know what makes certain people tune in to underwear. It is often women who are ordinary and dowdy on the outside who are buying my most sexy and exotic undies. And it applies to all ages. There are young girls who were brought up in a mass-produced age discovering lingerie for the first time, and quite a lot of older women who used to weather themselves. lovely things as girls and have kept themselves looking good." Janet Reger is proud that her Derbyshire factory still uses pins, even though the scarlet satin sets and filmsy black net cami-knickers are now big business, with production servicing two shops on London, one in West Germany and home and export orders.

This autumn she has designed a less-exalted range for Berlei, and tights in colours like raspberry pink and jade green are joining her other accessories (soap, perfume and bath products).

Janet says she always wears her own underwear, changing according to what she is wearing on top ("you can wear frilly french knickers only with a full skirt"). She is especially pleased when her 20-year-old daughter who manages the Munich shop likes a design enough

"The only thing that makes me upset is if someone tells me that underwear is so beautiful that she doesn't like to wear it," says Janet Reger. "I have women who tell me that they keep a boxed set in a drawer and get it out to droo! over. My mother's generation used to do that kind of thing with perfume. But I don't see the point of keeping things locked away."

Janet Reger:
"Quite dowdy women often wear exotic undies".
Polyester setin French knickers trimmed with lace. in silver, peach, jade, bronze, coral, £38 from Janet Reger, New Bond Street, Beauchamp Place, and Wirksworth, Derbyshire.

Photographa by Harry Kerr. Mustrations by Jill Feld

This used to be the time that lingerie shops This used to be the time that lingerie shops put away their scanties for another year and women came to return the fantasy creations clothe one in three British backsides. "It's that their men had bought for them at Christmas.

But the old ritual of sexy underwear bought for sexist reasons has changed. Now women are buying underwear for themselves all year round. And the people who are designing and producing the prettiest styles are themselves women, designing with their own needs in mind like the five designers on

The figures (numerical, not personal) show the changing trends in lingerie sales. British women used to buy three bras to every pair of knickers, according to Berlei (Britain's number two brand leader). During the past three years we have started to buy three bottom halves to every two tops, and the growth has been especially in upmarket lingerie, like the coordinated and prettily coloured sets of bra and panties or camisole tops with briefs.

not the Soho kind of sex, but there is a definite trend towards women spoiling themselves with pretty undies."

The sports bra and streamlined "active" underwear was supposed to be the lingerie trend of the 1980s, to complement tracksuits and clinging leotards. But the surprise best-seller of 1982 was Gossard's lacy besque: two million of these shapely garments, more redolent of the Naughty Nineties than the Action Eighties, were sold in the last year.

It seems that the more casual, simple and sporty our exteriors, the more we women long for undercover romance.

Now that the old-fashioned corsetière has disappeared, retailers have to meet the needs of the women of the 1980s. Big stores and high street chains may soon be challenged by smaller lingerie boutiques, a growing trend in this new year.

Julia Grahama:

lives, but I don't like anything overthy sexy, like split skirts or that terrible bondage look of bikini briefs with suspenders."

she says.
"I think fit and comfort are

sizing very relaxed."

Julia Grahame patently designs with herself in mind, especially the sophisticated satin or pure silk-robe, cut like a man's dressing gown or the equally dashing silk pyjamas. She shares her business with her husband, and tries on all their designs herself, to discuss with arm both the cut and the style.

"I believe that lingurie is for the sophisticated palette," she caplains. "It's like growing into olives or dry martinis. Girls don't get into pretty underwear until they are 25."

Her theory is borne out by her 18-year-old daughter, who eschews her mothers' designs for Victorian cotton night shirts or more sporty vests and knickers.

"But I really believe that some women are lingerie people, and you can't tell that at all by what she wears on the outside. She may be painting a ceiling wearing dungarees, butbetween underwear proper and gets a lift to her spirits from the party or at home wear.

THE TIMES **DIARY**

Watered down

Schindler's Ark, Thomas Keneally's Booker Prize winning novel, con-tinues its quirky voyage around the literary world. It is billed as nonfiction by its American publishers Simon and Schuster, though registered as fiction at the Library of Congress, and has had its name changed for the US market to Schindler's List.

Keneally assured me from his Australian home: "I would have fought them to the death if I thought I could have won, but they are very tough people. The fear was that the Americans might think the word ark implied passivity, which has been a sore point for survivors of the holocaust. Schindler's List is not a bad title but 4rk was better because it was not just a reference to Noah but also to the ark of the convenant. No worries. The book has already sold out its first US run

Wasn't it fun . . .

Christopher Robin went down with Alice, but not, surely, for the sort of educative experience envisaged in The Playbook for Kids about Sex, a work devoted to raising the sexual consciousness of those still struggling through Noddy in Toyland. Written by Joani Blank with pictures by Marcia Quackenbush, the book, from Sheba Feminist Publishers, says: "Here are some drawings of girls' sex parts. Do any of them look like yours?" For the more precocious seven-year-olds it offers: "Some kids start to have orgasms when they are very young. . Did you ever have an orgasm?" Older readers should resist the invitation to stand naked in front of a mirror and draw, in the space provided, one picture of your front (which could be humiliating) and another of your back (which , could give you a slipped disc).

I am not surprised that an Italian restaurant in Buckingham has closed. It billed one of its attractions as "knickerblocker glory".

Past endeavour

When we want something done, we form a committee. The latest, formed by Debrett's Peerage, is to hunt King Arthur, in the hope that a line of descent may be established between the once and future king and the latest royal bearer of his name, Prince William of Wales. The historian Geoffrey Ashe (address: Chalice Orchard, Glastonbury) claims the Arthurian legend can be traced back to a British king who campaigned on the Continent in 469, and is referred to in Breton records. He believes this figure fule at Cadbury, the "Camelot" site in Somerset excavated in the late : 1960s. The link was hinted at 200 years ago by Sharon Turner, a contemporary of Gibbon. Debrett will use the committee's findings for a book about the Arthurian legend's influence on our monarchy and

New aliens' residence permits issued by the Greek police carry the warning: "Failure to comply with any of the above requirements. making any false statement to a person carrying out registration duties, will render the offender liable , to a capital punishment (imprison-ment) or to a fine or both".

Off beam

Men from the Ministry of Defence are dining out on stones that a oped by boffins using a pair of cycle handlebars mounted on a universal joint, was effectively used to defend our ships in the Falklands campaign. The theory is that the device was employed to beam dazzling rays into the eyes of low-flying Argentine pilots so that they lost control and their planes were locked by their automatic pilots into a steep climb. I am sorry to shoot the story down, but the truth is that it started when a gullible reporter was hoaxed by servicemen into thinking that he risked being lasered alive if he stayed where he was.

● James Callaghan's former aide, Tom McNally, must have been embarrassed to find himself listed in the Telegraph's Sunday Magazine as one of "Labour's rising stars." He len Labour for the SDP in October 1981.

Callas's secret

The gynaecological history of Maria allas, until now neglected by musicologists, gets full exposure in he book by her husband and nanager, the late Giovanni Battista Meneghini, to be published by Bodley Head at the end of this month. Stung by Arianna Stassinocoulos's assertion that in 1957 he efused Callas's wish to have a child, deneghini files the medical eviience in his biography. My Wife Maria Callas. They wanted children, ne says, but a malformation of the sterus prevented Callas conceiving and she was unwilling to undergo surgery to correct it. After tests in 1957, Mcneghini adds, a specialist declared that the singer had reached e menopause at the age of only 34.

British bureaucracy moves at a snail's pace, but not without fellow

feeling. I have it rom the London Wildlife Trust that the rare clausilia biplicata (or two-ipped snail) was responsible for iltering the plans for the new Public Record Office at Kew. The original scheme would have destroyed a prime habitat, one of only five in Britain. Six years after completion of the modified building, the mollusc remains alive and well and living off

Ten years in Europe, 2: Peter Shore

Ignore the scare stories: it's time to get out

Ten years ago the Treaty of Accession taking Britain into the EEC came into effect, bringing with it the most far reaching changes in this country since Henry VIII broke with Rome: changes that involved the transfer from a democratic and sovereign United Kingdom Parliament of law-making, tax-gathering and treaty-making powers to non-elected institutions in Europe. no longer accountable to the people of this land. The damage to the democracy, to the prosperity and the self-confidence of the British people has been, and will continue to be,

At the time a number of linked objections to this unprecedented treaty, were made.

First that it was against the wishes of a substantial majority of the nation; that it was a constitutional outrage to drive it through a "whipped" Parliament, with tiny majorities, with no attempt before entry, either through a general election or a referendum, to test the will of the electorath.

Second, that we simply did not share the doctrine of "European Community" and the treaty aim of "ever closer union", which presup-posed a special and close relationship between the member states, different in kind from that which

> The entry terms meant a denial of the benefit of lower priced food

existed with any other countries. How could we? The United Kingdom's own special ties of language and people, trade and investment, are with English-speaking and Commonwealth countries outside the European mainland.

Third, that it was a profound error to believe that the economic dynamism of the original Common Market Six would rub off on the United Kingdom after membership: on the contrary, unimpeded competition with the temporarily more powerful economies of the Six within a customs union and the disarming of the state power of economic intervention that is the core of the Rome treaty itself, would simply further weaken our own

Fourth, that the terms of entry demanded a total acceptance, after a transitional period, of every policy and practice of the Six, without a single amendment to take account of the United Kingdom's very different interests and circumstance: terms that included full acceptance of the appalling common agricultural policy with its consequential burdens upon our balance of payments, the disruption of our trade with

EEC membership has imposed intolerable burdens on Britain's trade and industry, argues the Labour

party's chief economic spokesman. Withdrawal need entail no sacrifice

traditional low-cost food suppliers in Australasia and the Americas, and the denial for our own people of the benefit of lower priced food; and a formula for contributing to the EEC budget which imposed upon us a wholly disproportionate and unacceptably large net payment through the "own resources" system. In a sentence, the Common Market was not for us and membership

could not endure.

To these and other formidable objections the proponents of entry gave no satisfactory answer. They did, however, offer two comforts: that once we had joined, "nego-tiation from within" would remove the specific disadvantages of our entry terms; and that the enlarged Community would not merely dynamize our own economy but enable us, collectively, to secure economic and political objectives that Britain itself could not obtain. Beyond this, the pro-Marketeers simply asserted - Mr Heath and Mr Jenkins, our two Charlemagne Prize winners, in the lead - their own vehement commitment to the "European Idea". They had "seen the future and it worked".

Ten years later, what can one say? Few will now deny that "negotiation from within" has proved as abortive as negotiation from without; or that each one of the unresolved issues of 1973 - reform of the CAP, changing the British budget contribution, establishment of an acceptable fisheries policy etc - remain on the agenda of the Council of Ministers, to divide, frustrate and increasingly embitter the member states. Worse, that the sole safeguard, the veto in the Council of Ministers, has been dismantled by the decision of the other EEC members to outvote Britain last year.

Nor, alas, can it be said either that Britain has prospered since it joined - it has not - or that the Community itself, for all its economic size, has proved to be a haven for us or other member states from the tempest of world events.

On the contrary, within 12 months of Britain's accession the special vulnerability of continental Europe was revealed with devastating effects when the Opec countries imposed their oil boycott and quadrupled prices upon a wholly energy dependent EEC. Today the growth and self-confi-

dence that marked the EEC in the 1960s have quite vanished. Trade stagnates, output languishes and 11 million Europeans search for work. The many new problems that followed the first oil shock, and which new meaners the fineticing which now menace the functioning of the world economy, have elicited not one creative response from the "world's largest trading block", the

Politically, the decade of UK membership has been equally unrewarding. Although the referendum campaign of 1975 produced a clear but reluctant "Yes", there has been no underlying shift of British attitudes to the EEC. In external affairs, no one who has studied the reality, as opposed to the rhetoric, of European political cooperation, of 'speaking with one voice", can fail note the impotence of so-called European initiatives on the one hand and, on the other, the divisive effects that European cooperation has increasingly asserted upon the larger forum of Nato, widening the Atlantic at a time when, faced with increasingly assertive Soviet power in Afghanistan, Poland and else-where, the need for solidarity and close understanding is urgent.

History has moved on since 1973 - and still more since 1956. The EEC, which once boasted a giant's

> We should be ready to negotiate other trade agreements

strength. is - and is seen to be economically vulnerable, institutionally impotent, politically divided, chained to an obsolescent and virtually unamendable treaty.

The economic, political and security problems that we all face lie beyond the competence of the EEC to resolve. The European Monetary System is not a substitute for a revamped IMF, as the recent Frankfurt talks on exchange rate policies explicitly recognized. Seven years ago. a new international institution — the Summit of the Seven - had to be launched bringing together Britain, France, Germany and Italy with Japan, Canada and the United States. It will develop: for it is in this wider forum, if anywhere, that initiatives will emerge to deal wih the growing disorders of the world economy. There never was, and there is not

non-EEC countries.

Our aims should be clear. First, we must "patriate" the British constitution and disengage from the treaty arrangements in an orderly way and on an acceptable timetable. Second, we should stand ready not only to negotiate alternative trade arrangements but to cooperate with the EEC in as many non-treaty areas, including foreign affairs, as are mutually desired.

It is a paradox but a truth that the most creative period in the Western world, 1947-50, which saw the launching of the Marshall Plan, the and the European Payments Union, the war-shattered European econ-

now, any compelling reason why Britain should subject itself to the policies, the constraints and the goals of the Rome treaty. The claim that British jobs would be at risk because our export trade with the EEC will suddenly be halted or that US and Japanese companies would no longer wish to invest in sectors of British industry is simply scare-

We traded extensively with the EEC and attracted substantial thirdcountry investment to the UK before membership; and we shall continue to trade and to attract such investment after we have severed the link with the Rome treaty. The "trade deflection" effect of ceasing to belong to a customs union will gradually reorientate more of our manufacturing trade outside the continent of Europe and there will, of course, be a more pronounced shift as we resume food trade with

formation of the Organization for European Economic Cooperation and which achieved the revival of omies, took place with British and American involvement before the Rome treaty was even conceived.

Escape from the world slump of the 1980s and the achievement of a new balance of détente and deterrence will require policies and initiatives no less bold. In this, the European nation states, not the EEC. will have to play a leading part.

Roger Scruton

Why politicians are all against real education

complicity and influence, rather than through coercion or control. Such power is more durable and more popular than force. Hence political movements tend to posture as the friends of education, whether or not their real purpose is to destroy

The defenders of privilege argue for quality, and therefore standards; the defenders of equality argue for quantity, and therefore the destruction of standards. In their hearts, however, both are suspicious of education, which, by making privi-lege accessible, both challenges those at the top and perpetuates the distinction between top and bottom. Both sides aim secret blows at education. Some try to prevent it from spreading, others try to destroy it altogether, by spreading it too

thin.

Recently, however, a more effective strategy has been discovered. This is to make all education 'relevant". Traditionally a large part of learning was devoted to subjects which are wilfully "irrelevant" - like Latin, Greek, ancient history, higher mathematics, philosophy and liter-ary criticism. The syllabus rec-ommended by ancient thinkers consisted almost entirely of such subjects. And the ancient instinct Was wise.

The more irrelevant a subject, the more lasting is the benefit that it confers. Irrelevant subjects bring understanding of the human condition, by forcing the student to stand back from it. They also enhance the appetite for life, by providing material for thought and conversation. conversation.

This is the secret which civilization has guarded - that power and influence come through the acqui-sition of useless knowledge. The answer is, therefore, to destroy the effect of education - by making it relevant. Replace pure by applied mathematics, logic by computer programming architecture by engineering, history by sociology. The result will be a new generation of well-informed philistines, whose charmlessness will undo every advantage which their learning might otherwise have conferred.

Not surprisingly, the main objects of this attack have been the humanities. A person who knows only engineering or microbiology finds himself hampered by his knowledge which casts little light on his experience, and leads to no new communication with his fellow humans. A person with a classical or literary education, however, inhabits a transformed world, and sees meaning where others see facts. He is equipped not just to change the will interpret it in his own favour, and become master of his condition. The major task is to destroy the majestic irrelevance which confers this power.

Considerable ingenuity has been spent in inventing "relevant" humanities. The problem has been to

The power of education is conserve the outward prestige of education. It exerts itself through education, as an embodiment of the education, as an embodiment of the reasonable approach to life's problems, while persuading the uneducated that there is a learning addressed to interests which they

already have.

The answer has been found to lie in the word "studies". When added to a relevant-sounding prefix (such as "media", or "communications". or "black", or "gay") this word adjoins even to the most half-baked enthusiasm an air of superior knowledge. Not only are you right, it says, to be interested in the problems of the media, of blacks, of homosex-uals: there is also a way of converting enthusiasm into exper-

Consider the subject which has done more than any other to discredit humane education in American universities: women's studies. How did this subject come into being? When nineteenth-century philanthropists confronted the industrial revolution, "more edu-cation" was their cry - and when Arnold, Ruskin, Shaftesbury and Gladstone repeated it, more education there was. Similar, you might think, when twentieth century philogynists campaign for "women's studies" they are merely repeating the age-old folly of the English, in seeking educational remedies for problems that are beyond intellections are selected to the second of t tual control. In fact, however, the appeal of women's studies is precisely in its power to undo the

effects of education. Not only is it relevant, addressing itself to social and political problems which the uneducated student will instantly recognize. It also cuts across established disciplines, adopting and discarding methods according to imperatives that have no academic rationale. It therefore ploughs like a tank through the enemy's lines, and carries a swarm of believing students behind it.

Of course, no educated person is likely to take it seriously. For it is impossible to isolate the work of women from a tradition created largely by men; it is impossible to understand the social reality of womanhood without studying manhood; it is impossible to hold the jar of civilization to the light and expect the masculine and the feminine to separate like oil and

But that is precisely the point. The value of such a subject - which even a respected Scottish university has been tempted to introduce - is precisely that it destroys education. It keeps the student's mind so narrowly focused on his random and transient political convictions that, when he ceases to be obsessed with them, he will lack the education with their place.

Richard North

Hunting: in pursuit of the facts

"I know many huntsmen", said Bernard Shaw, "and none of them are ferocious. I know many humanitarians, and they are all ferocious. That was in his introduction to Killing for Sport (1914) by Henry Salt, vegetarian and former master at Eton whose The Nursery of Toryism (1911) never quite dealt the death blow to that school, any more

than he got bunting outlawed.

A great tribe of rational people have tried to stop their fellow men from getting themselves up in red coats and chasing about the countryside in pursuit of dog and fox. The anti-hunt brigade has been as richly dotty as the hunters, and the rest of us have let both get on with their battles, believing that, very roughly, they deserved each other.

But this last year has seen a significant event in the anti-hunting ampaign: the Conservative Anti-Hunt Council is now on the march, matching the Liberals, Social Democrats and those left-wingers who have always equated hunting with oppression of the working class. The anti-hunters have not always

troubled to consider what effect hunting has on the country's foxes. We know extraordinary little about the creature which lopes along the hedgerows and past suburban doorsteps. But we do know more than we used to, and most of it suggests that hunters and their opponents are about equally ineffectual in influencing the fox's numbers and way of life.

There are two great difficulties

with any argument about hunting as a method of controlling foxes: it apparently has no effect on the overall number of foxes surviving to the spring, and there is no evidence that foxes in general need control-

Wild animal populations very seldom need culling. The few wild animals that regularly reproduce and survive in numbers sufficient to cause man any trouble are mostly introductions, like the rabbit or rat, though the foreign mink appears to have found a stable niche. The fox, however, is indigenous to Britain. and its population is maintained by a reproductive cycle which ensures, in the summer (when there are around 500,000 of them), about four times as many youngsters as can survive the winter's dearth of food. Food supply, not predation, controls fox populations: the absence of voles, not the presence of hunts, is what stops a fox explosion. The fox

had little to fear even when there only, mostly unnecessary, animal enemy. Indeed, a man who kills a fox sometimes merely creates a spare piece of territory for another

Hunts, however, are reckoned to be efficient at picking off weaker foxes. "Most good, fit foxes which give us a hard run will get away from us", said Ian Coghill, the British Field Sports Society's conservation spokesman. If he is right, the foxes which his Worcestershire hunt catches and kills would probably have been among those which would not have survived the winter anyway. He claims also that no one knows how much of a problem foxes would be in the winter, when their wild prey is scarce, because hunts have always played a part in keeping fox numbers lower just before the worst of the winter. Few foxes, it seems, take lambs or

chickens from farms. There is evidence that nearly all lambs which are taken are already dead.

Scrutator, a noted mid-nipe-teenth-century fox-hunting writer. said forthrightly that he thought foxes were little trouble to poultry.

If a farmer complained to me of a fox visiting his hen-roost, I gave him directions to shoot him, if he could, well knowing he [the fox] must be a cur or mangy". In Cleveland there is a farmer's wife who has used foxes to keep the rats in check on her farm:

they left her free-range hens alone.
But the farmer shooting the occasional errant fox creates a potential hazard. In Sweden it has been shown that many foxes killed by hunters had previously been shot

In this country it is almost certain that around ten times as many foxes die by shooting, collisions with cars. and by monstrously cruel snaring asby hunting Clearly, many foxes are roaming the country in dire, and man-made, pain: the fox-hunt seldom causes injury, only a more or less untimely death.

Those atavastic yahoos stampeding about on horseback, though conceivably loathsome in their blood lust and in presuming to judge better than nature or God which foxes should die this winter, are actually the best of some fairly awesome evils, though many country people, with the hunts now in full cry, resent the intrusion on their lands and tranquillity.

Roger Boyes describes how Poland's suspension of martial law has failed to win the media over to the Jaruzelski regime

Warsaw Imagine a world in which Bernard Levin and Auberon Waugh have revulsion at events in Britain, write only for the sewage workers' journal. Unhappy with television, Sir Robin Day and Michael Parkinson drive taxis and, to make ends meet, Anna Ford-Boxer serves sandwiches near the Holborn Viaduct.

To the jaded in metropolitan Britain, that may seem like an attractive fantasy. To the readers and television viewers in Poland, it describes a situation very close to reality, the reality of "internal emigration"

Some of Poland's most talented journalists, including Stefan Brat-kowski and Darius Fikus, now write for a monthly for blind people rather than for the official press (quoting. rather obviously perhaps, "in the country of the blind, the one-eyed man is king"). Others have their work published in an obscure semiacademic journal called The Organizational Review. In these small circulation magazines (the one for the blind is, of course, printed in Braille), they write in elaborate allegories of the situation in Poland. but even so, they are heavily

Outside the home of the Solidarity leader. Lech Walesa, last month, the man touting for passengers in his cab was once a television commentator. Taxi driving, he says, is akin to journalism: the pointless conversations, the taking of zloties for mileage, the licence for eccentricity.

Throughout the year of martial law, the scene has been the same throughout the media: actors boycott television, film directors "rest", quietly preparing subjects for the period after martial law (though without great hopes of recapturing the freedom of the Solidarity era), or in the case of Andrzej Wajda and Agnieszka Holland, work abroad. The propaganda chiefs in Poland

thought that suspending martial law would change the situation. The western approach to Poland and sanctions would soften and the creative elements in the country, taking their tune from the church, would return to the fold and help restore credibility to the Jaruzelski government

It has not worked out like that, and this is perhaps the greatest disappointemnt for General Jaru-zelski - who is married to a university lecturer and who knows many writers - and for the deputy premier, Micczysław Rakowski, an ex-journalist married to an ex-ac-tress. In journalistic and film circles it is argued that suspension of martial law means tighter, not looser, control of the media, closer cooperation with the Soviet Union and the embracing of an "art accessible to the masses" ethic which will eventually destroy the quality of

The exception to this trend is the Catholic weekly Tygodnik Powszech-nv nublished in Cracow and edited he

Polish writing, theatre and film

The editor regrets - he prefers to be a cabbie

by a close associate of the Pope, who was once Metropolitan of Cracow. This weekly has benefited from the general drift of church-state rapprochement and takes journalistic risks not evident in other newspapers. It was the only paper, for example, to publish any memoirs of internment, albeit written in highly poetic terms by Andrzej Szczpiorski, the novelist. who was released in the spring. Even this was censored: the article

moves from a description of exercise the camp to a sudden blank space. a series of dots and the phrase "decree on martial law, paragraph two, article 17, point four". This is the section of the regulations that permits the censor to extract anything which the authorities consider potentially harmful to Poland from all published texts. Closer examination of the newspaper shows that most articles are peppered with these deletions, sometimes leaving a gap in the middle of a sentence. The back page the newspaper records whole articles that were written for the newspaper but never appeared herause of censorship.

Suspension of martial law has not removed this censorship, though interference with post and telephones is now permitted only if the prosecutor expressly wishes it (a broad category) or if the person concerned is under investigation. If anything, censorship is likely to get worse rather then better. A draft press law makes editors personally liable for anything that appears in their newspapers — that is to say legally liable under the suiff penal code. An article critical of the Polish vernment will thus never see the light of day in the official press, for the editor himself becomes liable under anti-state agitation laws.

Much depends, of course, on how the new laws are administered after martial law is lifted. Mild criticism is already permitted in certain newspapers by certain writers - Daniel Passent in Polityka for example but the room for manoeuvre is limited. Tygodnik Powszechny, because it is linked with the church and not the official state distributors, s the only paper to notify readers of what has been censored, so it is otherwise difficult to know

what is being repressed. Certainly Polityka, the main official weekly (formerly edited by Mr Rakowski). once tried to investigate the circumstances surrounding the shooting of demonstrators in Lubin but had the story killed by the authorities the day before publication. Copies of the page proof have been circulating in the underground for some weeks. for some weeks.

The "internal emigres" argue that the government's behaviour towards writers, actors and film directors is symptomatic of the running of the whole country. On the one hand, the authorities call for consultation and

dialogue with the people and the creation of a broad consensus, on the other band, in order to achieve that consensus - code-named national accord - they cut out many dissonant voices. Editors of hardline Marxist papers are thrown out because they disagree with the party line of General Jaruzelski, but so is the editor of a women's magazine because she publishes an interview trying to set the record straight on a former Polish hero, Marshal Pilsud-

The authorities threaten to close down the film makers' union unless Andrzej Wajda and four other directors with Solidarity sympathics resign from its leadership. The list is endless. Everyone talks of national agreement - the government, the church, Lech Walesa, the underground - but everyone is talking in a different language. Until a common vocabulary is agreed. Poland's main journalistic stars will continue to

PREPARE TO BOARD

The arrest at sea of Danish law. They derive from the Community policy, just a full set trawlers is something for which Fishery Limits Act of 1976. It is of national policies minus one there can be no enthusiasm well to be aware however that whatever. The Danes are among whatever. The Danes are among their legality within a European the last of our friends with whom jurisdiction is less certain. we wish to quarrel. Yet the Government is right to threaten arrest and prepare for it should the Danes invite it. More than enough of the fishing grounds properly regarded as British has already been opened to exploitation by others in the negotiations for a permanent common fisheries policy (CFP) in the European Community. No more can be ceded. Britain agreed to a bad but bearable bargain towards the end of last year. So did the rest of the Ten with the exception of Denmark, whose political arrangements give its important fishing industry enough pull to overrule its own government

The Danish fishermen calculate presumably that by challenging their exclusion from waters they want to fish they may win a judgment in the European Court to fortify them in their attempt to get the deal reopened. Mr Peter Walker has confidently informed the Commons that the measures he has prepared would be legal and effective, and he cites the President of the European Commission in confirmation. The legality of the powers he contemplates using is

Regulations made under the Treaty of Rome just before British (and Danish) entry into the Common Market fixed the principle that all Community waters - now extending to a coastal zone of 200 miles - shall be open on equal terms to the fishing vessels of all members states. Temporary "derogations" to that application of communism were incorporated in the 1972 Treaty of Accession, giving countries some preferential en-joyment of their coastal waters. They expired on December 31

They were supposed to be But there is no revised CFP. The Council of Ministers, mindful of the Luxembourg compromise at the heart of the European compact - that where very important national interests are continued until unanimous and establishing a revised policy by majority vote. Instead they adopted the subterfuge of sepa-rate but parallel national regulations all enforcing the terms of the agreement the Danes would beyond question in domestic not endorse. Thus there is no

be a Community policy. These national regulations

might be challenged on the ground that power to establish rules of the kind belong exclusively to the Community, and that the only Community rules now in place are those requiring equal access. Some sort of EEC sanction, it is true, has been afforded to interim national measures of a non-discriminatory kind for the purpose of preserving fish stocks where they are threatened by a failure of the Community to reach agreement. If that exception is claimed to cover the present measures it might be objected that they go much further than the immediate necessities of conservation superseded by a revised CFP. and that they are not non-discriminatory in as much as they

pick upon the Danes. These reaches of Community law are murky waters in which to fish. Whatever surprises they contain, Britain's concessions to at stake the discussion must be 'the Community have gone far enough to the detriment of its agreement is reached -, shrank own fishermen. The Government from overriding the Danish veto must stand put upon the terms must stand pat upon the terms agreed by nine of the ten; assume the role of maritime policeman if challenged; and wait for the Danish parliament to tire of isolation and heed the advice of its ministers to accept the deal as

PYM NON GRATA

The British foreign secretary is not welcome, it seems, in Sandi Arabia. Not just now anyway. That is a regrettable but not entirely surprising state of affairs, after the tactless way the British government handled the proposed visit to London of the Arab League delegation last

That visit was cancelled, it will be remembered, because Mrs Thatcher was not willing to particularly since Mr Kaddumi receive a representative of the was a full member of the Palestine Liberation Organiza- delegation received by President tion as one of the delegates. Her advisers thought that the Arabs would not insist on this, as they had not insisted on it when a similar delegation visited Washington in October. That was a mistake. The American position on the matter, though unpalatable to the Arabs, has been clear and consistent since 1975: America has not recognized the PLO as a necessary participant in the Middle East peace process, has not had any direct official dealings with it, and has repeatedly said that it will not have such dealings unless or until the PLO explicitly recognizes the right of Israel to exist

The British attitude has been quite different. Britain positively urges the PLO to recognize Israel's right to exist because in the British view, the PLO will have to be associated with the negotiations" on an eventual peace settlement; British officials regularly meet PLO officials to argue this point. British minis-

to encounter PLO representatives in informal or multilateral would have been excluded from the meeting with Mrs Thatcher, PLO's foreign minister, Mr Faruk Kaddumi, was one of a meeting Mr Pym. two-man Arab League delegation which saw Mr Douglas Hurd at the Foreign Office last July.

The Arabs, therefore, had some reason to expect different treatment in London from what they received in Washington -Mitterrand, that well-known friend of Israel, in November. But if they felt entitled to insist, they also felt they could afford to. Not to go to Washington would have meant ignoring the only realistic route to a peaceful settlement. Not to go to London was a gesture worth making to prove a point. In the brutal but usefully frank words of Prince Bandar ben Abdullah, published on this page yesterday, the visit amounted to little more than a courtesy call, because Britain, in terms of influencing events in the area, is almost irrelevant".

Matters were made worse by the clumsy compromise which London proposed at the last minute - a compromise, presumably, between the views of the Foreign Office and those of Number Ten, The Arabs were asked to "confirm" their rejection of terrorism - a request they were bound to regard as insulting - and the PLO to state (or rather allow Britain to state on its behalf) its readiness for mutual ters do not, but have been willing recognition with Israel.

Even then, the PLO delegate

The consequences of this remarkable balourdise are not yet tragic. The affair has not assumed "Death of a Princess" significance: the Sandis have kept a better sense of proportion. The British ambassador has not been sent home, and Prince Bandar's assertion that "the Sandi way" is to "hit the Westerners where it hurts - in their pockets" happily represents government policy. Still, the competition for contracts in Saudi Arabia is always so intense that Britain does not need a political handicap. That a deputy minister can express himself publicly in such terms, even in a personal capacity, is indicative of an ugly mood.

The good work done by Lord Carrington in building up Anglo-Arab relations has been undone, out of little more than carelessness. The lack of rapport between the Prime Minister and her Foreign Secretary must be at least in part to blame. Let us hope that Sir Anthony Parsons, the distinguished Foreign Office Arabist who has now moved into Number Ten, can do something to put things right. What is required is not softness on principle but greater clarity, consistency and seriousness in applying our principles to the Palestinan issue.

THE DANCE OF THE MANDARINS

An important Government reshuffle takes place today and nobody will notice. Three of the country's more outstanding permanent politicians are filling vacancies at the Ministry of Defence, the Department of Employment and the Department of Energy. As civil servants Mr Clive Whitmore, Mr Michael Oninlan and Sir Kenneth Couzens are not and will never become household names. But, at least in the case of Mr Whitmore at Defence and Mr Quinlan at Employment, they will outlast their ministers (Sir Kenneth has but three years at Energy before retirement) and could wield the kind of substantial influence over policy to which elected politicians aspire but rarely attain.

They represent the latest instalment of a batch of changes at the summit of Whitehall the scale of which is without precedent in Civil Service history. There is no sinister reason for this, no Thatcherite purge of centrists and closet Keynesians. After the victory parades of 1945. Whitehall had to telescope six years intake into the old administrative class into three. They have departed as they arrived, in a bunch.

In many ways the new pensioners are a sad generation. As oung assistant principals with vartime experience in the Armed Forces they joined a profession which had just presided over a glowing success story. British economy in 1962 at the

The week resultant and the second sec

mobilized more successfully sion. But all three were still in the Axis side. Even rationing had careers when stark reality gone well, "a mixed economy intruded with the 1967 devalu-writ small", was how the points ation and the general tarnishing system was described. Wartime of the Wilson era. planning for the peace was construction of a comprehensive welfare system. State power wielded firmly but benignly was the way forward. Recruits brought in by the reconstruction competitions were to be the staff officers who made it happen.

In sad reality, as senior officials in the 1970s, they one has been more bitterly social resources, while planting recontruction intake of civil country's inability to carry its fession. wartime performance into peace or has cared more than they about putting it right".

Their successors carry less emotional baggage into their intractable circumstances since permanent secretaryships. True, 1945. Permanent secretaries, the Mr Quinlan joined the Air automatic pilots of British Ministry in 1954 and Mr government, cannot build Whitmore the War Office in achievement alone. Only minis-1959 before the most punishing of the seven postwar defence reviews. True, Mr Peter Middleton, who succeeds to the top Treasury job in the spring, began his professional interest in the

coming to fruition with a series for the top jobs because they are of nationalizations and the men for difficult times and not, they would make good chairmen of the Finchley Conservative Association. Like them, the Hancock at Education, Sir Anthony Rawlinson at Trade, Mr Michael Franklin at Agriculmorale-sapping policy failures. difficult task of limiting the One of their number, Sir Leo damage wrought by recession on Pliatzky, wrote last month: "No- the country's productive and conscious than the postwar seed corn for the future. They will live, too, through considerservants from the forces of the able change in their own pro-

> Nothing will benefit the country and the Civil Service more than a set of policy successes wrung out of the most mobilize the national consent needed for successful implementation. Without that, the best laid schemes of permanent

average for every year from 1966 to 1981. This country by the same definition had unemployment of almost 11 per cent for 1981 and

higher rates this year. The three of consistently high employment are Sweden, Norway and Austria.

This information (which can be checked in the OECD Economic Outlook for July) throws serious doubt on several popular explanations of present United Kingdom levels of unemployment and official excuses for tolerating it.

First, "world recession" extraot be

First, "world recession" cannot be given all the blame if these three countries retain, in spite of it, unemployment rates characteristic of Britain in the 1950s. Second, technical progress can

hardly be overwhelmingly important as an explanation if economies among the most technically advanced and progressive have not succumbed. Third, the rise in this country's

arnings from oil cannot do much to explain its exceptional unemployment, since Norway, with a relatively larger oil sector, is not similarly affected.

Nor, fourth, can either high government taxing and spending or high levels of social security be a prevailing reason, since Austria, Norway and Sweden have all devoted in recent years a higher proportion of gross domestic pro-duct than the United Kingdom, both to current and to total government outlays, and all have taken a higher proportion in taxes and similar receipts. The difference has been especially marked over social ecurity transfers.

Fifth, inflation in Austria Norway and Sweden has certainly been less fast than in this country, but in the last two at least it has not been negligible. Over 10 of the last 17 years, Norway and Sweden have each experienced consumer-price

Sir. May I comment on your report

("Country house protests rejected", December 15)? The Government

have not refused to move the planned M40 route "to avoid

still seems to need persuading. JEREMY BENSON, Chairman.

our finest twentieth century topiary garden planted within its even more

From Mr Peter Caddick-Adams Sir, An important new factor has entered the "nuclear debate". It is one that the unilateralist camp must consider very seriously before continuing to brand the Govern-ment and multilateralists as warmongers or of wanting to maintain the status quo in nuclear weapons.

It is, of course, the Russian offer to reduce its SS20 missile force, in return for the West cancelling its cruise and Pershing missile programmes. Had we responded to the CND's call to cancel the deployment of cruise missiles, the Soviet Union would not have felt so threatened as to offer to cut back its missile force.

Whilst this offer as it stands is nacceptable (preserving as it does the Soviet superiority in intermediate range nuclear weapons), it does offer a basis for negotiation; as any vendor of a house will know, the final settlement will differ from the initial offer. Here is the proof that the CND have been asking for the policy of multilateralism is working. Yours faithfully,

PETER CADDICK-ADAMS, Brampton Lodge, Newcastle-under-Lyme.

From the General Secretary of the Campaign for Nuclear Disarmament

Sir, I am grateful to General Hackett (December 16) for amiably exoner-ating me personally from the charge of Soviet funding. But he does need to check his sources about those sums (Dr Luns - \$15m in 1981!) supposed to be flowing from the Soviets to the Western peace

The General quotes Yuri Zhukov in Pravda of April 30 of this year. The article is worth reading. In it Mr Zhukov goes out of his way to mock repeatedly those who say that the peace movements are "agents on the Kremin payroll". The Soviet peace fund is mentioned but only as a source of support for the Soviet Peace Committee.

That great Powers do their best to influence public opinion in their direction I do not for one moment doubt. That the peace movement in the West has been bought is quite another. Unsubstantiated allegations are not helpful and the issues are too important for diversions of this sort. Yours faithfully,

BRUCE KENT, General Secretary, Campaign for Nuclear Disarmament. 11 Goodwin Street, N4. December 20.

LETTERS TO THE EDITOR

The road to reducing unemployment

inflation higher than the present rate in Britain of about 7 per cent. Sir, To those who regard the present Over 10 per cent of those, too, each had inflation higher than the OECD average. At their peaks each had inflation over 14 per cent for a 12-month period. It would seem that no support is given to the view, sedulously promoted by the Chan-cellor, that stable prices form a necessary condition for high

If we look for what these three countries have in common to explain their success in maintaining employment, we find that all three have institutions that allow wage rates to be determined by a set of social decisions rather than by restrictions on society's output. These institutions depend on the active cooperation of central trade union and employer organizations; indeed in Sweden the government plays no direct part in the process.

The lesson for ourselves may well be that full employment depends on the development of such consensual arrangements for wage fixing and that, despite past failures, every effort should be devoted to constructing them. This must surely involve the cultivation by govern ments of relations of trust with the unions rather than the reverse. Insofar as wages have nevertheless to be set or controlled by govern-ment without active union cooperation, there would seem to be grounds for trying to apply over wage relativities explicit canons of fairness such as central trade-union organs might reasonably be expected. to accept.

National trade-union leadership will also bear a large share of the responsibility for unemployment if it does not deliver effective union cooperation to a government that is seriously attempting to reach a COUSEDSIDE OVER WINGES. Yours faithfully,

ANTHONY CLUNIES-ROSS. Department of Economics, University of Strathchyde, Stenhouse Building, 173 Cathedral Street, Glasgow. December 20.

Farnborough is an eighteenth century house in a superb setting

damned with noise for ever. Beckley might be shielded from sight of it, but not from sound. At Farmborough nothing can ever hide the road and the scar from the terrace above. It will stretch from horizon to horizon

There is a fundamental problem here to solve. Both houses are 'listed" grade L. There is no listing system yet to protect our great gardens, parks, and "designed" landscapes. A proposal that lists be compiled and published was debated in the Lords on December 21 and well supported, but the Government I am, Sir, still your obedient servant. The Georgian Group, 2 Chester Street, SW1.

Houses for sale From Mr F. V. Savage

Sir, Article 1 of the European Community Convention on Human Rights, accepted by the United Kingdom in 1966, states that no one shall be deprived of his possession except in the public interest. Not that anyone bothers about Common Market laws these days. Nevertheless it is clearly immoral for any Act of Parliament to permit the transfer of property from one sector of the community to another when such a transfer results in personal gain to the transferee and does not benefit society at large.

So where were all those illustrious persons who penned their names to the letter of December 9 opposing the latest Housing Bill which gives rights to tenants of charitable housing associations, when the number one charitable institution, namely, local government, was being forced to sell its council houses to U-manara?

Yours faithfully, F. V. SAVAGE. Savage & Partners, 1 Blucher Street, Chesham, Buckinghamshire.

Nuclear reactor safety

From Mr S. C. Goddard Sir, The highly selective interpret-ation your Science Editor puts (The Times, December 13) on the latest report of the Advisory Committee on the Safety of Nuclear Instal-lations, entitled Some Aspects of Safety in Pressurised Water Reactors, is difficult to reconcile with the report itself

In its general conclusion (para 9.1) the committee states that it has looked at a number of areas in depth, in particular the integrity of the pressure system, and that the safety case for the PWR can be substantiated subject to certain conditions being met. The committee also "believes that

the industry and the regulatory authority have the resources necessary for these requirements to be met. effectively and satisfactorily". Your Science Editor's description

Sudbury House.

of the report as "potentially devastating...on safety aspects" plainly does not square with the report's conclusions. Yours faithfully, S. C. GODDARD,

System Strategy Engineer, Central Electricity Generating East Grinslead, West Sussex. 15 Newgate Street, ECI.

Hypnotizing prosecution witnesses

From Lord Gardiner, CH

John Thornton, for explaining in his letter (December 20) the position about the hypnotizing of witnesses for the prosecution.
It would add to our indebtedness

missible. Yours faithfully,

GARDINER

From Dr H. B. Gibson

Deputy Assistant Commissioner, the Metropolitan Police (December 20) does not exactly allay the fears that

that "Safeguards are built into our procedures which enable variations if a witness, say, on first reporting an attack recalls that the assailant was white, but subsequently under hypnosis "remembers" that the is noted in the police files? But what is of more importance is whether, when someone is brought to trial, these "variations in recall" are brought to the attention of the court.

A report of a trial at the Old Bailey where the defendant was found guilty on the evidence of a

Sir, I am much indebted to the Deputy Assistant Commissioner, Mr

if he would tell us, first, whether or not, when winesses for the prosecution have been hypnotized, the defence has been informed that the witnesses have been hypnotized; and secondly, whether he is aware that in some of the states of the United States the evidence of hypnotized witnesses has been found to be so unreliable that appellate courts have tended to rule the evidence of all hypnotized witnesses as inad-

House of Lords. December 21,

Sir, The letter of Mr John Thornton,

are being widely expressed about the use of hypnosis in police investi-He makes a cryptic observation recall to be readily identified". What precisely does this mean? That

ssailant was black, the discrepancy

Christians and Zionism Divorce restriction

From the Bishop of Durham Sir, Rabbi Goldberg (feature, Dec-ember 11) asks Christians to accept the reality of Jewish statehood and adjust their theology accordingly. As one who unhesitatingly accepts this reality, and also as one of the authors of the British Council of Churches' report which he cites as evidence against this view, I ask him

to be so courteous as to read the relevant parts of the report again. He accuses it of querying "the wisdom of Christian support for political Zionism . "What it actually does is to query "the wisdom of support by Christians for political Zionism on theological grounds" (italics in the original). The difference is crucial and the fact that Rabbi Goldberg apparently

is to communicate with one another on a subject where feelings run so high.

There are many excellent historical and political reasons for regarding Israel's right to statehood as unquestionable. To add theology to them, however, and Christian theology at that, is in our view unhelpful and presumptuous. To absolutize political conflicts theolo-

does not see it is yet another example of how tragically difficult it

gically runs the risk of making them irreconcilable. That was our point and if he can truly grasp it I trust that Rabbi Goldberg will come to see that it has nothing whatever to do with thoughtless criticisms of the State of Israel, or the merely conditional acceptance of her existence, which

he justifiably describes as ominous. Yours faithfully. JOHN DUNELM: Auckland Castle. Bishop Auckland, Co. Durham. December 13.

Mr Alan Clark, MP, states, with reference to the sales of works of art from Althorp, that owners are absolutely entitled to take whatever steps, within the law, that they think appropriate to retain their properties

for their children. He seriously over-simplifies the issues involved.

Owners of property of any kind are, of course, entitled within the law to do what they like with their private possessions. However, in weighing up the issues involved in trying to maintain and retain historic houses and their contents. most owners are very conscious that they have social responsibilities which go well beyond their family and legal duties. Indeed, most owners regard themselves as stewards, both of their family heritage for the benefit of future generations and of part of the national heritage for the benefit of the whole community. Yours faithfully, MARCH

(Deputy President, Historic Houses

Right and proper

Association). Goodwood House,

Chichester, West Sussex.

December 17.

From Mr Brian Kemball-Cook Sir, In reply to Philip Howard's query (December 9) about the expression "the right-hand file", this does not appear to refer to the position in which senators sat, to which no reference is made in Plutarch's Coriolanus, which was of course Shakespeare's authority, in North's translation. There Senate are simply opposed as a body

to the common people.

When editing the play (New Clarendon Shakespeare) I followed the general interpretation that this is a military term, the right-hand side of the battle-line being the place of nonour. Yours faithfully,

BRIAN KEMBALL-COOK, 23 Grosvenor Road,

hypnotic session had been conduc-ted. The judge claimed that the hypnotist's evidence would be "hearsay". The defence lawyers were therefore unable to question it. In this difficult matter the society of which I have the honour to be chairman has assisted the Home Office in their endeavours to

previously hypnotized witness (see

New Scientist, December 2, 1982) revealed that the judge had refused a

request that the hypnotist should be

called to give evidence on how the

formulate guidelines for the police to follow, and we have assisted in arranging interdisciplinary seminars at the Home Office and elsewhere to this end. I think that the defensive attitude taken by Mr Thornton, and certain other police officers who would

persuade us that "all's well - leave it to the police" is not entirely helpful. Many psychologists and others who have expert knowledge of how, under hypnosis, fantasies may be woven with "memories", are by no means satisfied that the safeguards in operation in various police forces

are at all adequate. It seems that more informed public debate is necessary. Mr Thornton tells us that the Home Office and the DPP are aware of the guidelines that they, the police, have issued to themselves, I believe that it will be more satisfactory when the Home Office, having fully consulted a wide spectrum of psychological and legal opinion, issue the guidelines to the police. Yours faithfully,

H. B. GIBSON, Chairman. British Society of Experimental and Clinical Hypnosis. 10 Manbattan Drive, Cambridge.

From Mr Alastair Service Sir, Those who, like myself, were closely involved with setting the Divorce Reform Act 1969 on to the statute book will have read Mr F. M. M. Steiner's letter (December 17) wishing that a cure for marriage breakdowns was as easily available

as he suggests.
I would claim no more for the Act than that it was and is a worksble and broadly just answer to the needs of very large numbers of people in society. The numbers of divorces had been rising for years before, reflecting steadily accelerating changes in most people's attitudes and in women's status.

My reading of the social surveys. evidence is that Mr Steiner's-proposal to restrict divorce might encourage a few couples to stay together, but would produce a huge number of people separated but undivorced. That would contribute nothing to the wellbeing of parentsor

or children. welfare. They lie not in restricting p. divorces, which only reflect pair-hi bonds that have failed among theer varied new stresses of modern life,he but in sustained education, prep-ir aration and supporting guidance form

parenthood and marriage.

The National Children's Bureaux and other organisations are develop-ic ing such positive programmes; the sooner these are disseminated and a made available, the better for familying life in this country. Yours faithfully, ALASTAIR SERVICE, 75 Flask Walk, Hampstead, NW3.

OBITUARY

LOUIS ARAGON Poet of the French Resistance

Louis Aragon who died on was a writer of undoubted distinction but curiously unin essence, one of the last of the old-style hommes de lettres. A leading member of the surrealist movement in its heyday (the 1920s), he later became the prototype of the Communist intellectual, prostituting his talent in crude and servile propaganda. Yet he was also the leading poet of the Resistance during World War II, inspiring thousands of French men and women, of widely divergent political views, with his vibrant-

ly patriotic verses.

Born in 1897, Aragon fought in the First World War and then devoted himself to literary activity rather than resume his medical studies. His first two reflectal studies. First living the collections of poetry were Feu de joie (1920) and Le Mouvement perpètuel (1925), but perhaps a more distinctive contribution to surrealist literature is to be found in two novels. Anicet (1921) and Le Paysan de Paris (1926), which combine essentially realistic matter with strikingly surreal-

istic treatment. Throughout this period Andre Breton was the dominant influence on Aragon's ideas, and it was in Breton's wake that he drifted towards the Communist Party in the mid-1920s. As late as November 1924 Aragon felt able to dismiss the Russian revolution as "on the scale of ideas... at most a vague ministerial crisis". Breton by then was already coming under the influence of Lenin and

Trotsky.

At the end of 1926 a small group of surrealists led by Breton and Aragon joined the Party, only to withdraw the following year after meeting with incomprehension and hostility from the apparatchiks. In spite of this they remained committed supporters of the Party and of the Communist International, with hopes of displacing the Party's "official" intelligentsia, represented by Henri Barbusse whom they regarded as pompous conformist and unoriginal. There seemed a good chance of this as the Comintern entered its most

radical period after 1928. to resume his Party member- France and was decorated three Aragon will be chiefly remem-

visited Russia, where he attended an "International Conference of Revolutionary Writers" in Kharkov. This was to prove a turning-point in his career. Like other foreign intellectuals before and after him he was overwhelmed by his first direct experience of the "homeland of socialism". He was persuaded to sign a statement admitting his own "shortcomings" as a communist and repudiating Breton's "Second Manifesto of Surrealism", published the previous year.

The final breach came in 1932 when Aragon publicly repudiated an attempt by Breton to defend him against charges arising from his incen-diary poem Front Rouge be-cause in the same pamphlot Breton protested against the Party's attempt to censor surrealist publications. From then on Aragon was an unconditional Communist. Breton blamed the defection of his removed its financial support. friend on the influence of Esa Triolet, the Russian-born woman (sister-in-law of Mayaing his wife and remaining with

him until her death in 1970. Thereafter Aragon became a model Communist intellectual, working for the Party daily l'Humanité, becoming editor of the monthly Commune and the l'oyageurs de Impériale (1943) evening paper Cc Soir, and and Aurélien (1944). All those praising uncritically all aspects are interesting in their different Soviet pact.

ship and for the first time times. Taken prisoner, he bered.

escaped to the unoccupied zone of France in 1941 and played an active part in the Resistance, publishing the collections of poems for which he is most justly famous: Le Crève-coeur (1941), Les Yeux d'Elsa (1942)

to show some glimmers of independence. Even then these reflected tensions between the French Party and Moscow rather than any inclination to question the authority of the Party itself.

street debate with Daniel Cohn-Bendit, at the height of the "May events" of 1968 in the Quartier Latin, while undoubtedly a courageous personal gesture also reflected the Party's need to establish a dialogue with the student revolutionaries. None the less, Les Lettres Françaises made itself an important symbol of the French Party's movement towards what became known as "Eurocommunism", and was forced to close when the cancellation of officially-sanctioned subscribtions in the Soviet block

Perhaps the most unexpected consequence of Aragon's conkovsky) who lived with Aragon emergence as a historical noving from 1928 and inspired his ist obedient to the prevailing tenets of social realism. Under teel, the general title Le Monde réel, emphasizing his abandonment of surrealism, he published four loosely related novels: Les Cloches de Bale (1934), Les Beaux Quartiers (1936), Les of Soviet life including the ways, and certainly superior to Moscow Trials, and attempting the six-volume Les Commuto defend the 1939 German- nistes which followed them after the war. But it is for the surrealist Le Paysan de Paris, In 1930 Aragon was allowed distinction in the battle of and for his wartime poetry, that

In spit of this, he fought with

After the war he remained a faithful interpreter of the Communist Party line - taking part, for instance, in the personality cult of Maurice Thorse carefully modelled on Smart's best known film Thorez, carefully modelled on that of Stalin. Only in the 1960s, as a member of the Party's Central Committee, editor of its literary review Les Lettres Françaises and established doyen of French Communist intellectuals, did he again begin

DICK EMERY Versatile television comic

Dick Emery, who died on January 2 at the age of 63 was a comedian known in millions of households not merely for his own persona but for the galaxy of characters he created on the television screen. A versatile character comic he had a range and, under the pseudonym of character comic he nau a management and under the pseudonym of disguises at his disposal: perhaps the public's favourite perhaps the vulgar, man-Emery's best known film, though his own preference was for the lovable, senile Lampwick. These and a host of other impersonations were to make Emery one of the best known and most highly paid com-

edians in British television. Richard Gilbert Emery was born in Bloomsbury on February 7, 1917, His parents were a hard working stage double act known as Callen and Emery and the theatre was part of his experience from an early age. As a baby he was taken on tour by his parents; as a child he participated in their act and later appeared in pantomimes and summer shows.

Emery possessed a fine tenor voice and his early inclination was for opera. His natural talent however steered him always inexorably towards variety and with the war he joined the RAF and soon became an indispensable member of Raiph Reader's Gang Shows. After the war he appeared regularly at the Windmill Theatre.

It was radio which gave him his first major break however and in Peter Brough's celebrated series Educating Archie he gave a foretaste of the versatility that was to make him such a successful television comic, with such catchphrases as "Oh. I hate 'vew" and "We've got a

His earliest television appearances were with Libby Morris in Two's Company and in Michael

appeared in Michael Bentine's It's a Square World on BBC television, but it was his own Dick Emery Show which began on BBC TV in 1963 which was to establish his style and his reputation. At first Emery's shows followed the standard pattern of such entertainments. sketches, song and dance routines, one line cracks. But he worked hard to break this mould, to create a series of comic incidents which would provide a fitting vehicle for the gallery of characters - virtually all played by himself - that he had at his disposal.

Over the next twenty years he was to become one of the BBC's biggest attractions, yet he never made any secret of that perhaps perennial fear of the comic, insecurity. This perhaps re-flected itself in a private life which included five marriages.

ill health continually threatened Emery's career. In 1972 be won the BBC TV Personality award from the Variety Club of Great Britain but missed the awards cer-emony when he was rushed to hospital. In recent years he had suffered from heart trouble. stomach disorders and eye afflictions which required a series of operations.

and later as Recorder of Ipswich, he made a favourable impression, and successful appeals against him were rare. In 1962 Shaw took silk, and

at once found himself in the front ranks as well as the front row. He would have liked to have developed a practice on the civil side, but his clients, by continuing to instruct him in heavy criminal cases, made this difficult. His biggest test came in 1966, when the notorious Richardson gang was rounded up, and the horrifying "torture trial" took place at the Old Bailey. The choice of leading prosecuting counsel was of the greatest importance, as these evil men had tyrannized over their manors for so long, and such success, that they boasted that there was no one in England whom they could not subdue. But in Sebag Shaw the bullies met not only their match but their master; without any outward display of emotion, he proved himself to be lucid in important forensic qualities of exposition, powerful in argu-clarity, courtesy, imperturb- ment, and deadly in crossclarity, courtesy, imperturbment, and deadly in cross-ability and tenacity. His ser examination; the gang was vices were much in demand smashed, and its leaders received well-deserved and con-

dign punishment. In 1967 Shaw was elected a Bencher of his Inn. In the following year when he was 61 years old, he was made a judge.

TO YOUR EMPLOYEE, IT'S A MISTAKE. TO YOU, IT'S ANOTHER REASON FOR JOB SPLITTING.

People can make mistakes. When they make them at the end of a long, boring day of monotonous, repetitive work, you can hardly blame them.

There's a fair chance they're not exactly looking forward to the next day's work either.

So they're absent, or they leave.
As an employer, you're bound to be interested in ways

of improving productivity by cutting down mistakes.

And your staff will welcome ways of being happier in

their work. What you need is the Job Splitting Scheme.

Quite simply, it means that two people take it in turns to do what was previously one job.

They can split everything - the pay, the hours, the holidays, the benefits.

Naturally you'll have some extra admin, but the Government gives you £750 for each split job to cover most, if not all, of your extra costs.

In any case, they'll be more than offset by increased productivity and fewer mistakes.

People in a split job can work a half day each. Or one week on and one off. Or part of a week. So they now have free time to look forward to.

That'll make many jobs more attractive. And so give you the chance to hold on to trained staff and reduce recruitment and training costs.

Job splitting allows working parents more time with their children.

It gives people the freedom to develop interests of their own.

Or to take up further education.

You can use job splitting to create the flexibility you need to arrange working hours in more productive ways.

Get a leaflet by filling in the coupon. Or ring Kätherine Rennie on 01-213 4065. Because every day you'll get a few more reasons for job splitting.

A tougher ride for the **Exchange**

On the face of it, there appears to be some comfort for the Stock Exchange in the judgment in the Restrictive Practices Court to allow travel agents to continue a closed-shop dealing system.

In the court in January 1984 the Exchange is due to defend its rule book, which supports a system of single capacity and minimum dealing commission scales. It will be the second key test of restrictive practices legislation as it affects the service indus-tries. The first was last week's case involving the Association of British Travel Agents.

In the Abta ruling a closed-shop system involving package tour operators and retail travel agents is being allowed to continue.

The Stock Exchange could be forgiven for feeling that Abta's success in defending its exclusive dealing must mean that, while each case will stand or fall on its individual merits, the court's decision is a helpful augury for its

OWN COSE. But a crucial factor in the Abta case, as perceived by the court, was that no complete and equally effective system was shown to be available as a substitute in giving protection to the

public. The point is hardly likely to be lost on Sir Gordon Borrie, director general of the Office of Fair Trading. Not too much in the Abta hearings was made of alternatives. although the role of insurance was stressed.

But, with the Stock Exchange, he could point to how in other countries there are systems where the roles of brokers and. jobbers are combined.

The Stock Exchange could be facing a tougher ride than Abta appears to have had:

Markets

Shares leap at Ocean **Transport**

Shares of Ocean Transport & Trading, the shipping and freight group, were building up a full head of steam on New Year's Eve leaping 6p to 82p for a two-day rise of 12p. Speculation has built up in

the market that the group may be contemplating selling its 58 per cent stake in the Straits Shipping Co. This has followed the collapse in the share price from 130p amid fears that the group will be unable to maintain its final dividend of 6.7p gross. In August the group reported a setback in interim profits of £1.6m to £10.9m. warning that the second half could prove even worse.

Elsewhere, Security Centres made a long-awaited return following its suspension in November at 207p. The sharesopened at 255p before advancopened at 200p before advanc-ing to 265p, a rise of 58p. This follows the acquisition of National Guardsman, the New York security monitoring group, which last year earned profits of around £800,000.

The FT Index closed 3.1 up at The FT Index closed 3.1 up at 596.7, although turnover remained thin with investors paying close attention to the New Year's press tips.

Gilts suffered a sudden relapse with falls of up to £1 and fewer of a cut in the Opec.

amid fears of a cut in the Opec crude oil price. However, oil shares closed above their worst levels helped by the resumption of trade on Wall Street.
Shares of Mellins, the cloth-

ing manufacturer and property group, leapt 9p to 116p after the recent decesion to buy the children's wear interests of R & J Pullman, Mr Touker Suley-man, the new chairman who bought 6.7 per cent of the shares with an option to buy further 23 per cent, says he is planning no

new announcements. Nevertheless, since his involvement the shares have risen from a mere 20p. The market is now talking of 150p a share when the deal is announced.

The biggest mover on the week was Cockedge, which leapt 19p to a new high of 38p. Earlier in the week Suffolk

Securities, a privately owned group, bought 29 per cent of the shares at around 9p a share.

Mr Ian Wasserman's G. M. Firth leapt 14p to 195p reflecting its recently acquired stake in little Arlen Electrical, the electrical plug and lighting group, which recently developed a new electric starter motor for strip lighting. Arlen leant 130 to 169p.

Beer prices to rise by 2p a can

By Derek Harris,

Canned beer prices are expected to rise shortly by around 2p for a 16-ounce can. But draught beer prices may stay at their present level for the

The price increases affect off-licence outlets, especially the supermarket chains which often renegotiate their annual contracts during

Packaged beers account for less than a fifth of beer production and sales through supermarkets yield brewers

their slimmest margins. But supermarket sales offer the brewers their best chance of keeping up production volumes. This is because the brunt of sales decreases has been taken by pubs.

A number of clubs are in financial difficulties because of sharp dips in custom, particu-larly in the recession-hit North of England and West Midlands.

The brewers have been under growing pressure from pub-tenants to hold draught beer prices. The National Union of icensed Victuallers, the trade association for pub tenants, has called on brewers to freeze prices for a year.

There are fears that a fresh round of increases would drive down sales in the pubs to the point where an increasing number would be faced with

So far the brewers have given no specific commitment on a price freeze but those in areas badly hit by unemployment are not contemplating any specific price rises. Beer production this year is

These forecasts are based on current oil technology, the present oil technology, the present oil tax system and the continued absence of a depletion policy. But Phillips & PSBR as a percentage of GDP Drew adds: "We do not think it would be wise to suppose that relaxation of any of these underlying assumptions would make a major difference to the output profile."

"Such a movement would make it progressively more difficult for any government continuously to reduce the without further large cuts in public expenditure or increases in taxation."

The drop in revenue looks less bleak when calculated with editorence to the continuously to reduce the post of the progressively more difficult for any government continuously to reduce the progressively more difficult for any government continuously to reduce the progressively more difficult for any government continuously to reduce the progressively more difficult for any government continuously to reduce the progressively more difficult for any government continuously to reduce the progressively more difficult for any government continuously to reduce the progressively more difficult for any government would make it progressively more difficult for any government continuously to reduce the progressively more difficult for any government continuously to reduce the progressively more difficult for any government would include the progressively more difficult for any government continuously to reduce the progressively more difficult for any government continuously to reduce the progressively more difficult for any government continuously to reduce the progressive progressi likely to prove to have declined In the first ten months of last The drop in revenue looks less bleak when calculated with 3.2 per cent compared with the adjustments for inflation, same period in previous years. about a third of group profits since the merger in the late 1960s which gave birth to the

NatWest group.

It has been criticized in the past for selling out Orion and for buying National Bank of North America, which is now over its problems, Mr Wilkinson says. However, NatWest has apparently managed to avoid any alarming exposures on the international front.

"I like to think its come from prudence," he says, pointing also to the bank's system of risk assessment and country limits. He says that the bank began reducing its exposure in Latin America because it saw problems looming about two years ago. NatWest's South American exposure arose not through balance of payments financing but through financing exports of

Wilkinson says. He agrees that the growth in international lending is prob-ably over for the moment, but he still sees room for NatWest's international side to grow.

"Expansion opportunities are there for us to grasp in North America. They are there for us to grasp in the Far East," he says and he expects the contribution from international operations to increase further as a proportion of group profits.

Although Mr Wilkinson is taking over at a difficult time in

banking, he has broad experi-ence within the NatWest group. His previous job was deputy group chief executive with overall responsibility for dom-

estic banking.

He has had experience of international banking as a director of Orion and he has also been chief executive of the group's finance house subsidi-ary, Lombard North Central.

In one sense, the departure of Mr Leigh-Pembeton may make it easier for the new chief executive to establish himself. Mr Wilkinson has no doubt about what his new job entails: responsibility for all the bank's operations and executive and

big corporate customers, Mr have found employment out- 1984. side the government.

Mr Sprinkel would like to be asked to be chairman of the Federal Reserve Board when Mr Paul Volcker's term ends in August But I very much doubt if he will be asked.

Mr Regan is looking in other directions. Like all the dominant officials in the Reagan team in Washington, Mr Regan is in a panic about the level of unemployment and in his fear has turned to the Federal Reserve for help.

The Domestic US economy is not the only issue sending Mr Regan into a funk. He is worried about the strong dollar's effect on US export trade (and hence on the domestic

economy).
Mr Regan is also worried about the trend of the world economy, and in particular about the threat of a collapse by indebted, less-developed coun-

tries.
Like many other officials in Washington, the secretary of the Freasury has long since abandoned the defeat of inflation as his priority. Now he has other concerns and these are leading him away from the Sprinkel

Mr Regan has embraced the following policy lines in the in the last six months: The defeat of unemployment

must be given an overriding priority. Hence, rapid expan-sion of money must be permitted and even encouraged. The Federal Reserve must cooperate in this policy.

Mexico, Brazil, Argentina and government spending.

markets must be given a lower priority and instead the Fed will again intervene in the foreign exchange markets.

There could hardly have been a more complete rejection of the policy lines implemented by Mr Sprinkel and the treasury team during the first 18 months of the

Monetary control, the basis for the attack on infistion, has been abandoned. The policy of leaving the dollar to find its own

value in international payments bas also been abandoned.

The Treasury is set to use the little-known Exchange Equalizaion Fund to support the dollar.

Massive funds will also be made available by US taxpayers for the "big bail out". The money will go to Mexico, a socialist state which used its oil lpower with arrogance when it

Gradually, Mr Regan has given ground to the Europeans and by now, European policies have gained ascendancy.

We are to have a weak dollar. domestic inflation in the United States (which has been given the role of "locomotive" to drag the world out of recession) and a huge new foreign aid pre-gramme to be financed by US

All this adds up to a return to the spirit of the Nixon-Burns policies of the early 1970s.

Maxwell Newton

FIXED-INTEREST STOCKS to the oil glut and a reduction in energy prices.

THE TIMES TUESDAY JANUARY 4 1983

By Stuart Jones, Football Correspondent

Liverpool

Those who wish may continue to discuss the destiny of this season's goal of his remarkable season, league title. It may help to fill the odd empty hour and the followers of Manchester United and Nottingham Forest particularly may be disturbed the side nations from close disturbed the side nations from the close disturbed cager 10 keep the subject open. Onlookers who have seen the form of the holders, Liverpool, recently will know better than to argue against what seems ineviable.

they are so outstanding that they could almost form a superleague on their own. The score is misleading.

Arsenal, who claimed a consolation goal near the end, were outclassed in

the rest, such as the irrepressible Lee scored from an acute angle. In and the screne Sounces, is to silence between Hodgson read Nicholas's a band that is marching in time, in backward intentions, rounded Jentune and in harmony.

Arsenal never came close to achieving any of those Herculean tasks. Rush added the twenty-first clusive and Arsenal's defence was under pressure from as early as the thirteenth second when Dalglish disturbed the side netting from close range. Only briefly on either side of the interval did it cease.

against what seems inevtiable.

Liverpool yesterday afternoon sextended their lead at the top to 10 points, their triumphant home run to 11 matches, and the belief that they are so outstanding th not be too pleased about that, Twice the young central defender was left stranded out on the touchline. Dalglish bamboozled him there before the half-hour and Rush

Visiting Anfield, never a warming prospect, has now become fear-some. To contain Rush is to halt a waterfall. To restrict Dalglish is to catch a blob of mercury. To quieten

Forest concede more ground

To be fair to Albion, they did at least stick to their plans, however unbecoming they might have been. That rear defensive wall looked to

have been made from rough stone and it was just as durable. Whitehead, Bennett and Robertson

snapped into the tackle like guard

In midfield Jol was just as abrupt, carning one booking and often firring with the critical second while Owen was a little more constructive, even to the point of mounting the odd lurch forward with his left side partner, Statham.

It was in attack that Albion's

attitude was most starkly exposed. Neither Regis nor Eastee got in a shot that was worthy of the name, and there was little evidence of that

So it continued, Manchester pushing forward eagerly enough but less and less convincingly as the Albion did move our more often

and the pity was that they looked quite sprightly going forward. If only they had done it sooner.

Dines and pulled the ball back for

Liverpool's attacks came from all angles and usually at mesmerizing speed. Arsenal, vainly attempting to speed. Arsenal, vainity attempting to cut off numerous sources, had but one main idea of their own — the hopeful chip over the top. It worked for Talbot, who volleyed in five minutes from time, but Grobbelaar was troubled otherwise only by Rix's outrageously enterprising lob from inside Arsenal's half.

Petrovic, tidy but quiet, is one of retrovic, they but quiet, is one on few current players who can remember leaving Anfield on the winning side. That was eight years ago with Red Star Belgrade. Everybody else must be consoled by a small morsel of hope. In the next seven weeks Liverpool have only one League fixture at home.

LIVERPOOL: B Grobbalast; P Neal, A Kenne M Lawrenson, C Johnston, A Harrsen, Deiglieh, S Lee, I Rush, D Hodgson, Sourcess.

Dr Artemio Franchi, president of the European Federation and chairman of the FIFA referees committee, had been watching probably the most brilliant sports film yet made - G'Olé, the story of the 1982 World Cup in Spain, directed by Tom Clege with the sensitivity of a David Attenbo-

witnessed on TV by half the world's population. Coelho, of Brazil, the referee, is revealed as having almost no control or influence in a match finally salvaged by Italy's three exching goals. Up in the royal box, oblivious of kings and queens, the frail old Italian president gives the two firsted salvies of charvings. two-fisted salute of charvinism.

Yet G'Ole, rescued days before
the opening game by the backing of

DAVID MILLER

The deciding penalty sequence is Ladbroke Enterprises, is much more superbly cut from one ashen, than in indictment of Dr Franchi's emotionally drained face to the committee, who appointed 41 next. As the sad Bossis stands staring up into the darkness, licking moistureless lips after the final missed shot, we see a man momentarily, unbelievingly sensing his very existence slip away.

On to the final against Italy, the most cynical ever played, with 20 bookable fouls in the first hour for playing the man and not the ball,

than in indictment of Dr Franchi's committee, who appointed 41 referees all from different countries ther then any desire to administer an efficient tournament The producers. Drummond Challis and Michael Samuelson, shot a quarter of a million feet of Drummond

film, edited to 10,000, and the result is a hymn to the aspirations of not

own Norhern Ireland, quietly shrugging off the brutality of the inepi Spaniards.

There are fine sequences of the Camerouns, the Kuwaitis, of the camerous, the kawais, of the crusading but outclassed Kiwis being given what must be the definitive no-hopers' half-time dose of optimism from their manager. John Adshead, The harmonious

rnerging of Brazilian and Scottish clans on the terraces portrays the acceptable face of international sport, and at one point the impromitu, incessant samba music of the Brazilian fans is cumpingly superimposed on a training se-quence of their team in a deserted acium. Rick Wakeman's musical score,

with some cathedral sounds remin-sicent of Chariots of Fire helps G'Ole to capture the mood of much of this extraordinary, eatholic gathering of peoples which ought to be such a festival of skill but in

What can be done? Little, I fear

now that Hoao Havelange, president of FIFA, having created a personal power base among the third world, has seemingly capitulated to it. Seven of the 20 m of the executive committee are from

emerging nations.
As the Belgian lawyer Louis
Wouters, a member of the UEFA executive, says pessimistically. "FIFA are an untouchable body, it's like punching an empty coat. It was not a very important World Cup. some mediocre games, some awful, and the referees exactly the same. There was some very serious referees' mistakes, a lot of rough play and no severity from officials. The first hour of the final was a and so was Italy

When we ask for action all we get from Havelange is 'Non'. We ask Franchi for a plan. 'We'll see'. The referees committee will now go to sleep for another three years. What chance is there if they are not convinced? It's depressing. Compared to the finals in 1978 and 1974 we have not progressed, or even stood still, but gone backwards. But so long as the African and Asian countries do not threaten the number of European participants in the World Cup, I do not think anything much will happen."

Arthur McMullen the FA vicechairman and member of the UEFA referees committee with 30 years' experience, is doubtful whether the present purge of the professional foul in England will filter across the Channel. He says: "The Europeans say simply that we're the ones out of step. FIFA will not agree that deliberate handling of a through ball is serious foul play, worthy of sending off, only that it merits a free kick or a caution if it may have

prevented a goal.

There is a move to eliminate ungentlemanly conduct and violent conduct from the laws and replace them with only two categories of foul, unsporting and grossly un-sporting, which I support. But ultimately it comes down to the courage of referees, and changing the wording of the laws will not give them courage. It is not possible to believe that some of the things which took place in Spain were not

RUGBY LEAGUE

Leeds

scramble

Nottingham Forest went further adrift of the runaway League leaders an acute angle in the fiftyeighth a Liverpool by dropping a point in a 1-1 draw at Brighton. Forest dominated the first half, Young giving them the lead after 42 attended their lead at the top of the minutes with a header from Hodge's cross. Only Digweed's good goal-keeping kept Brighton in contention, helped by a slice of luck when Swain's 25-yard free kick struck a post. Despite being outclassed, Brigh-out of 12. The fiftyeighth and the fiftyeighth and the fifty sixth minute with a 25-yard shot, after a 20-yard run. The decisive goal came in the fiftysixth minute when Swindlehurst scored with a diving Swindlehurst scored with a diving Swindlehurst scored with a diving Sheffield Wednesday had the best of a nine-goal thriller against Charlton Athletic at Hillsborough. Holiday blues return

By Leslie Duxbury

Mancheater United's holiday blues, briefly dispersed by the win against Aston Villa on Saturday, settled like crows again over Old Trafford after this drab draw with West Bromwich Albion. Maybe the reason for the severe lack of skill, or even at times verve, was the surfeit of football in recent days.

But Albion also made a considerable contribution to the starility, particularly in the first half, by playing five across the back and then compounding that defensive tactic by giving their goalkeeper, Barron, as much of the ball as their isoland attract.

something concrete of it all and he came within a hair's breadth more

than once. One acrobatic fkick pushed the ball across the entire

Tottenham indebted to youthful enthusiasm

Tottenham Hotspur

Whether it was the sharp edge of Keith Burkinshaw's tongue or an injection, owing to an extraordinary

number of injuries, of raw but enthusiastic youth, Tottenham showed a considerable improvement yesterday on Saturday's performance at West Ham. Those missing included, alas, Ardiles. He has an car infection, which apparently has been caused by and overdose of jet lag: such are

the ailments modern players suffer. Tottenham were without nine others, for less noesworthy reasons.
Into their side came the highly
promising Dick, aged 17; Webster,
an 18-year-old defender making his
debut and the pinteriand Glosen aged 20, the hero of the day, who scored twice, his first League goals. As for Everton, they weaved some neat patterns but lacked something in midfield. Not that

Hoddle had it all to himself; bur the odd touch and shot, it was one of this sluggish days. Tottenham's inspiration was Dick on one wing, and Brooke on the other, neither was afraid to go it alone. Brooke, 100, can shoot - and hard, for a small man. Twice be went close from long range before

Archibald, after 22 minutes, pulled the ball back from the by-line, and Gibson, pouncing as defenders missed their lunges, thumped it

For a while, Tottenham seemed content to sit on their lead, although the spidery Johnson almost de-ceived his old Liverpool colleague, Clemence, who was forced to clean up a melée in the closing minutes of the first bald. The equalizer duly came, soon

after the break, Mazzon, another of the young brigade, failed to cut out a crossfield ball, Johnson hammered it in, Clemence beat it out, and Sharp, goal poaching, got there first. Everton, if anything, now looked more likely to triumph. Johnson had a voiley saved, Curran a booked effort tipped over, and Sheedy had a drive pouched at the foot of a post. Yet youthful enthusiasm is a sleeve at the end of a hectic festive programme. With 10 minutes left Gibson set off like a hare to reach Archibald's intelligent through pass and squeezed in the winner. A splendid triumph for what was getting on for Tottenham's reserve

a draw By Keith Macklin

In one of many tense finishes over the four-day holiday period. over the four-day holiday period. Leeds scraped a point from Oldham yesterday with a last-minute try and goal from their substitute, the powerfully-built scrum half, Kevin Dick. This lucky 12-12 draw enabled Leeds to leap over Hulf Kingston Rovers at the top of the first division table, but Oldbam's first division table, but Oldham's brave performance deserved a better resard.

it was overall a scrappy and disappointing game, punctuated continually by the referee's whistle. Oldham went into a seven point lead when a skilful move enabled Goodway, to score a try to which Parrish added the goal. Parrish then added a penalty goal, and a sluggish Leeds could get into the game only with two penalties from Conway.

McCurrie, the Oldham hooker, spent five minutes in the newly introduced sin bin for speaking out of turn to Mr Massey, but Oldham went further ahead with a try by Young Leeds came back with one of their famous Headingley revivals, and Andrew Smith squeezed in near

the corner flag.
The Leeds coach, Robin Dew-hurst, sent on Dick as substitute for the less experienced Conway, and he proved the value of a cunning old head when, in the last seconds, he took a quick tap penalty, dived over the Oldham line, and added the

Leeds will be looking to move into a much smoother gear before the John Player Trophy final with Wigan on January 22. In the second division Wakefield

Trinity moved into second place but they also had a narrow squeak after a magnificent fighthack by Dewsbu-ry, who pulled up from 13-0 down to 13-11 at Belle Vue and threatened to upset Trimity. Rutherford, Harrison and Coventry scored the tries for Trinity, Lyons kicking two goals to provide the 13-0 lead early

in the second half.

Then Dewsbury, sklifully prompted by their vastly experienced player-coach. Watson, drew within two points of Thinty with tries from Squires, Ramsden and Repharters. Richardson and a goal from Dunford. To Trinity's relief a penalty kick enabled them to raise the siege, and a further panalty gave Maskill the chance to kick a lastminute penalty goal in a 15-11 win.

victory. Pierino Fanna, the former

A shock for Juventus

Paris, (AFP) - Juventus dropped rans, (AFP) - Juventus dropped what could prove to be a vital point in the race to retain their champion's title when Cagliari, tenth in the League forced a 1-1 draw in the Turin club's usually invinvible Stadio Comunale.

Antonio Cabrini, playing his forst match for two months calabrated match for two months, celebrated his return to Juventus by receivin

an official warning before the game was 30 minutes old and Claudio Gentile, his team colleague, also had his name taken.
Jeventus went ahead in the 18th minute when Marco Tardelli ran on

to a through ball from Marocchino. But hesitation by Gaethand Scirca in the 57th minute enabled Luigi Piras, captain of Cagliari, to level the scores. Cagliari, showed the sort of defensive skills which have left the Sardinien side unbeaten in nine matches and the match fizzled out into a draw.

Verona, who are emerging as the main rivals of AS Roma in the race for the league title, earned a fine 1-2

Juventus forward, scored goals in the 15th and 53rd minutes. Pellegrini reduced arrears for Naples with a headed goal on the hour. Naples, hailed at the start of the season as possible championship contenders are now at the bottom of the table after 14 games. AS Roma were never under AS Roma were never under serious pressure in their home match against Genoa. An own-goal by Genois Conti, the Genoa defender, put Roma clear inside 60 seconds and the home side never looked back. The issue was put beyond doubt when Agostino di Bartolomei converted a free kick two minutes after the interest. two minutes after the interval.

Bonum Omen's task was made

It was confirmed vesterday that Night Nurse, the winner of the Champion Hurdle in 1976, and 1977, has been retired, Michael Phillips Writes. Latterly he looked a shadow of his former self after being pulled up in Newbury's Hennessy Cognac Gold Cup and then the King George VI Steeplechase at Kempton Park. In the circumstances his retirement comes as no surprise just as it was predictable last March that his trainer Peter Easterby would decide to pension off another of his great jumpers, Sea Pigeon, when it was clear that he too was a light of other days.

Figeon, when it was clear that he too was a light of other days.

In all Night Nurse wan thirty races under National Hmt rules and
£116,000 in prize money. He will go down in memory as the horse who came
the closest to bringing off the elusive Champion Hurdle - Cheltenham Gold
Cup double after he was runner-up to Little Owl in the hig steeplechase two
years ago. For a horse who excelled at hurdling Night Nurse became an
uncommonly good jumper of fences. The two techniques are very different
but Night Nurse adjusted brilliantly.

I shall never forget the reception that he and John O'Nell1 received at
Newhurz twelve months ago after they had both clawed their may back to

Newbury twelve months ago after they had both clawed their way back peak fitness from injury and combined to win the Mandarin Steeplechase.

Tarn misses Haig final

Tarn landed a qualifier for the Haig Whisky Novices Hurdle at Ayr

Final Argume yesterday but his owner-trainer-rider Tommy Tate said he will miss the final of the series at Newcastle in February, because he has unhappy memories of the track.

"It was over the Newcastle course that My Lord Brae won, then broke down badly and never raced again. It can be very heavy going there" said Tate. "Instead, he could go for a qualifier of the Panama series. He put up a bit of a lecklustre dignary. put up a bit of a lacklustre display today, and now earns a rest for three weeks. Tern might appreciate an extra half a mile". Tarp started at 5-4 on, but had

only a length to spare over

Old guard on stand-by

By David Hands

England's championship hopes, which seemed to falter early in the season with a rash of injuries, but soared again over the christmas period after their successful trial game, receive positive direction today with the announcement of the

on January 15.
There was no last-minute checking during yesterday's bank holiday games: the selectors resolved their team over the weekend and not even the possibility of a confrontation between two potential England number sixes, Jeavons and Gadd, at Moseley was sufficient to bring procrastination. Jeavons left the field to have stitches inserted in a gashed eyebrow during the 6-6 draw with Gloucester (Perry, who pulled a hamstring, and Metcalfe kicked penalties for Moseley and Ford converted Gloucester's try, scored by Spencer) but the injury between two potential scored by Spencer) but the injury did not seem too serious.

Blackheath's confidence and Sara-

Blackheath's confidence and Sara-cen's fragility in a staccato performance contrasted vividity on a grey unfriendly day at Southgate yesterday, Both sides contributed much that was laudable in an enjoyable match, but Saracens were seldom able to display a semblance of the polish of the club's

Saraceus were 100 often at odds

with each other to achieve that much. Yet they wee valiant adversaries, and it was only in the

adversaries, and it was only in the last second, when darkness threatened to envelop Saraccus and Hill sauntered through a rare gap to score the Club's second try that Blackheath's success and an important merit table victory was assured. Colyer's admirable conversion from the touch-line was merity the icing on the cale.

on the cake.

Winning by a goal, a try and two

winning by a goal, a try and two
penalty goals to two penalties.
Blackheath's assurance was plain to
see and with their captain. Kebble
among a handful not playing
yesterday, adequate strength in
reserve and an excellent spirit are
plainly indicated.

Of course it is not often that a club can wallow in this happy state,

but there is no doubt that this agreeable blend answers many a

Fylde are foiled by

Jeffrey By Michael Stevenson

Fyide ... Liverpool......

At half-time at Ansdell yesterday. At nati-time at Angeli yearras). Fyide and Liverpool, both lurking unpromisingly in the lower reaches of the Northern ment table, had provided extraordinarily hale entertainment in relation to energy expended. Afterwards the game warmed up to some decree, and warmed up to some degree, and some rather more acceptable New Year fare left Liverpool with a healthier merit position on 50 per cent through victory by a try, a drop goal and two penalty goals to a goal and a penalty.

McKeon's early command of the lineouts came in for the referee's close scrutiny as he received less and less aid from his colleagues, so his elevation became less impress-ive. Ian Aitchison missed a lockable penalty for Fylde but Askew was not so co-operative, when Young was not also lined in the lineout and Liverpool led after 12 minutes through his penalty.

A chapter of errors and singulation followed, accounting for a crime de ceeur from Rod irving, the Liverpool coach: "Come on, lads, do the simple things!" It was six minutes into first-half

It was six minutes into first-half injury-time before his words bore fruit. Liverpool moved the ball swiftly from left to right. Ian Aitchison gathered but missed touch and Slemen, over on the right wing as is his wont, caught brilliantly on the half voile; and fluing the ball infield to Jones. He fed Jeffrey who jinked twice thrillingly before Robbins and the powerful Noss handled well to put Unsworth in near the right corner Liverpool went further ahead Liverpool went further ahead through Askew's second penalty but a superb break and try by Moran, facilitated by I presumed the imminence of scissors move with Smith, was converted by lan Aichison.

Now Fylde took impressive control. Favouring the eight-man shove in the tight, they applied tremendous pressure which seemed certain to win them the match. Liverpool tackled bravely and, always dangerous in counter-attack, duly weathered the storm and broke away for the fleet-footed Jeffrey to make good ground, kick high and apply a little pressure of his own. Fylde seemed taken aback and, with slow to organise. Jeffrey's cool drop settled the issue.

BASKETBALL

A gallant failure by Palace

might have entertained about the

the last 10 minutes that the inevitable nerves were soothed sufficiently to allow him two

Crystal Palace Maccabi Tel Aviv64

penalties.

Calling on all their experience, nerve and exceptional understand-ing, Maccabi Tel Aviv regained the World Invitation club champion-ship, sponsored by Philips, at the National Recreation Centre yester-day when they overcame Crystal Palace in a final that was as memorable as most of the games that had preceded it.

It was Maccabi's fourth triumph in five successive finals but one that was so tight that it must have reminded them of their only defeat against Athletes In Action two years

encounters with the Israelis over the years but this was as close as they have come to succeeding. Twice Palace took the lead in the second

size of their task against last eason's European Cup runners-up.
Once again Maccabi possessed the match winner in Berkovitz, who, whether he was carrying the ball downcourt, flipping back-hand-ed passes, stealing the ball from oponents, or going for jump shots. always seemed to be the graceful master. Invariably he seemed to have abundant time and space on his side. He also had the most useful colleague in Perry, the beanpole

Aroesti, in fact, missed much of the first half after McCray had accidently poked an elbow in his eve. Neither did there seem to be anything malicious in McCray's duel with Williams, which did not materialize into the explosive affair many had predicted. It took Palace's American centre

seemed almost to have too much fouls mounted up on both of them. Williams, his task completed with 10 defensive rebounds, was fouled out with 41 seconds left, and McCray finished with four offer to his name. He had performed with an intensity that epitomized Palace's determination, their refusal to buckle every time Maccabi increased their lead to six points. From Palace's point of view, in a

game which was generally domi-nated by the defences, the pity was the shooting form of Jeremich and Johnson, two players who usually guarantee them the bulk of their

was like a cat on hot bricks - and no more in line than Tavaré and Cook had been. But he hung gamely on, picking up runs to third man and surviving a scare when Thomson at deep square leg, caught him off a noball I say a scare, for it was certainly that to us in the stands, deafened by 30,000 Australian cheers. It says much for Randall's resilience that he lived to fight another day. What quality there was in England's batting came from Gower, whose life consists not just of batting for England but of being required to save them.

In the field England needed to in the neid England needed to made up some of the time lost to take every chance that came their way, and to make some that did not. This they failed quite to do. Although Botham did miraculously kell to catch Hookes, and Cowans made a good low catch to get rid of Hughes. Border was allowed to escape. He would have been caught im the gully off Cowans, before he had scored had there been one, and.

For the seventh wicket he and in the gully off Cowns, before he had scored had there been one, and, when he was 15, Gower could have caught him at silly point off Hemmings.

215 for five at knoch. Of the his right, caught and bowled morning's 32 overs 18 were bowled Lawson. Eight runs later Lamb took by Hemmings and Miller. At 150 a good diving catch in the gully to Hughes mishooled Botham to midget rid of Thomson. Hughes mishooked Botham to midon; in almost every match in
Australia this is one of the
commonest ways of getting out.
Hookes, all arrogance, whacked
Hemmings a time or two past cover
point off the back foot before being
caught at alip, trying to do it again.
Botham, protecting himself against

Cat on hot bricks: Randall attempts to hook a ball from Hogg

At 173 for four England had made up some of the time lost to

For the seventh wicket he and Yardley added 43 before Yardley was bowled backing away from Cowans. The new ball had just been As it was, Australia, having taken and there was still some shine started the day at 138 for two, were left on it when Botham, falling to 215 for five at much. Of the his right, caught and bowled morning's 32 overs 18 were bowled Lawson, Eight runs later Lamb took

different times in the day Gower, Botham and Taylor were all to be some and laylor were all to be seen conducting operations, imbeknown to Willis. Among his many qualities the captain numbers no real tactical feel for the game: he is a bolter of stable doors – after the horses have bolted. Nor has be been belief at this tack by horses. helped on this tour by having no specialist short leg to pick up the sort of reflex chances which Wessels has been taking for Australia.

Australia's last wicket fell to Hemmings, who had a good day except for allowing the left handers too many chances to step away and force him through the covers. With force him through the covers. With nine wickets down when the was due to be taken, the interval was postponed for long enough to give Hemmings time to have Border well caught low down by Miller, running in from cover point. The way this ball turned, and lifted – it reached Miller off the outside edge of Border's defensive bat – was enough to establish that in their second innings Australia could be made to struggle. For that to matter, England struggle. For that to matter, England need first to get a lot more runs.

Cowdell bows out at the top

BOXING

By Srikumar Sen, Boxing Correspondent

Pat Cowdell, Britain's European featherweight champion, has retired

just 19 days before a voluntary
defence of his title. The man the
boxing public robbed of recognition. gave up the ring yesterday because he did not want to rob the public by not being able to give of his best. He told his manager Ron Gray that he was not able to give himself wholly to boxing any more. Mr Gray said: "Pat had told me that the day hestopped enjoying the game he would pack it in, because it would not be air on the public, and that is what Mr Gray said that Cowdell stayed

up all Saturday night talking things over with his wife, and came to see him on Sunday. "I backed him when he was fighting and I backed him again," Mr Gray said. "All credit to Pat. He could have picked.

different kinds, marks this first week of a new tennis year. The annual World Championship Ten-

annual world Championship 1ca-nis doubles tournament, sponsored by Barratt Homes, begins this evening at the Albert Hall. In Washington, DC, the women have begun their first official World Championship, a tournament series

that will last throughout the year.

Britain begin their challenge for
the European indoor version of the

Davis Cup competition, the King's Cup event, which they last won in 1967. Britain play Germany in Kiel on Thursday and Austria in Vienna

on Sunday, in addition, the national junior indoor championships are in progress at the David Lloyd Slazenger club Haston.

satisfying is the fact that the teams that world champion's credentials include the champions of France did not include the French, (Sherwood Stewart and Ferdi Wimbledon, or US championships.

Big pay day for Cash

Melbourne, (Reuter) - Pat Cash, of Melbourne, the world's leading junior player, became the youngest winner yesterday of the Victorian Open title in ins 1012-year history. Cash, aged 17: earned his biggest prize of \$14,000 when he overpowered the Ouenslander, Rob frawley to win.6-1, 7-5 in the final Cash's world ranking, which stood at 67 before this tournament, is expected to break through to the top 50. The Wimbledom and US junior champion hopes by this time next year to be in the world's top 20. Yesterday's victory capped a sensational Australian summer season for Cash, during which he has accomplated about \$38,000 in prize money in two months. He produced a dazzing array of passing shots and was able at the same time to capitalise quickly on for lanuary 16 in Spain.

capture the old form long after it has fied, to hear from Cowdell: "Boxing means dedication, training honestly, watching your weight, and going to bed at nine. I had three ambitions: credit to Pat. He could have picked wanted to Pat. He could have picked at nine. I had three ambitions defending his European title, and could have had a world title fight in the retire while I am still at the top. I missed the first two. Now I want to make time with my wife and It was refreshing in a game where spend more time with my wife and many champions keep on trying to children." But Cowdell has told Mr

During the first four days the teams will compete in groups of four on all-play-all basis. The winners of each group will then play the

runners-up from the other group in Saturday's semi-final round. One group consists of Curren and Denton, Brian Gottfried and Raul

Ramirez (former French and Wimbledon champions), the twins Tim and Tom Gullikson, and last year's winners. Heinz Gunthardt and Balazs Taroczy.

in the other group are Stewart and Taygan and three familiar Davis Cup partnerships: McNamara and McNamee, Pavel Slozit and Tomas Smid, and Anand and Vijay Amritraj. McNamara, incidentally, will not play for Australia in their Davis Cup tie with Britain in Adelaide in March. He said yesterday that this was the second time a Davis Cup tie had coincided

time a Davis Cup tie had coincided with the imminent arrival of a McNamara baby. This time he will stay with his wife and son at their .

London home, rather than fly across the world to play tennis.

... The new features of the women's

will have a points system to determine the official world cham-pion - approved by all the relevant governing bodies. This makes sense, But how embarrassing it would be if

game: "He will be training with the boys still," Mr Gray said, "and will

weeks' time, and the chance of a on Astronur today and tomorrow, world title challenge it was surprising to hear of Cowdell's international match this season, and Warden to the Cowdell's international match this season. quickly. He is not pre waiting indefinitely.

Cowdell was always a counter-puncher with a good left hand that puncher with a good left hand that told an opponent not to take liberties. It was this counter-punching style, together with his self-efficing manner outside the ring that meant he never won him the recognition he deserved. Cowdell won four ABA titles at three weights, a Commonwealth gold medal, a European silver, an Olympic bronze and the British and European featherweight titles.

neutral umpires in order to be graded as full internationals. In this case the umpires appointed are Graham Nash -(England) and Santiago Deo (Spain).

It might help Britain's cause to be alver medal at the Moscow Olympic Games of 1980, but they are weakened by the absence of Barber and Leman who have declined the invitation to Barcelons. Both

Waring had the same knack of being himself and therefore

Waring bad the same knack of being himself and therefore a true personality as opposed to one of the window-drersed TV species.

I enjoy McLaren's occasional use of Scotnish idiom. Last season he referred to some confused play as "a mixter-maxier." I had not heard that since my youth in the land of oatcakes. Whether it charmed English viewers is another matter.

Football I watch now and them—more them them now and them—

more then than now considering that the last match! I saw was the

Soviet Union against Scotland in the World Cup in June. John

Motion seems excellent to me, and also Jimmy Hill in his way,

also Jimmy Hill in his way, although I meet people who say they cannot stand. Hill because he is opinionated. This is rather like objecting to a hen for laying eggs. Hill's opinions, however dogmatically put, are what he is there for.

The cricket commentators please me. I disagree with those who find them too talkative. Richie Benaud is collected in Tom Graveney senet.

summer Laker said too laconically

of somebody's innings that it was "short but brief." But mishits as

first I ever heard. That was on the

a self-appointed authority on all sport. I heard John Arlott for the first time in. 1948, describing Bradman's Australians. It was he, I think, who said that Bill Johnston, the Australian bowler, moved about

gont." I continued to tune in to and relish Arion for the next 30 years.

He was the Cardus of the spoken word on the game.
The voices of E. W. Swanton and

Rex. Alston, if less idiosyncratic, became equally familiar. "Deater receiving". Swanton used to say of the lordly one as he faced the next

Voices that enlighten and sometimes enrage

Well said, sir

In the season of goodwill towards ball. Cryptic and quaint and

all men let us declare an amnesty for probably in character, that was. "
sports commentators, in particular think I can see a cloud no bigge

important than easy targets such as the Government, British Rail and the Government, British Rail and the press, but you would not think so from the insults rained on them.

I think a commentator's lab.

them too talkative. Richie Benaudis ar crash. Into his minute or so enlightening. Tom Graveney generous, Jim Laker laconic. Last could compress a wealth of vivid

palpable as that are rare.

Radio commentators are helped
Cricket commentators were the by the fact that the listener cannot

radio, in the unspoilt days before commentators, on the other hand, the TV deluge turned everyone into: are almost as exposed as the players.

surprising to hear of Cowdell's retirement. The 29 year old Warley boxer was Britain's best hope for a world title. But perhaps the quiet Midlander, who picked himself off the floor in the fifteenth round to lose to the great Salvador Sanchez on a split decision in Houston in 1981, does not believe that the world title challenge will come so quickly. He is not prepared to go on have a rule, in case anyone has

A question of status for Britain By Sydney Friskin Although the Great Britain team are now in Barcelona there is some recently returned from the tournament in Melbourne. However, Mailett (England), Kerly (England). Pappin (Scotland) and McConnell (Northern Ireland) have reinforced

the British squad.

doubt about the status of their two matches to be played against Spain on Astroturf today and tomorrow.

European countries must have neutral umpires in order to be graded as full internationals. In this

taries. He was a contemporary of G. V. Wynne Jones, who told me in

ruity accents over the air about Cliff Morgan, Lewis Jones, Bleddyn Williams and all the other Welsh wizards of the time long before I saw them in the flesh. Sammy Walker performed a similar service for the property of the same of the

water performed a similar service from Landsdowne Road, his voice soaring into a stratosphere of inaudibility when the Irish pack had the ball at their feet or Jack Kyle

and Noel Henderson were breaking

Occasionally I heard John Snagge on the Boat Race and Stewart MacPherson on boxing and Ray-mond Glendenning of football, boxing or racing, Nobody on TV

has better voice control than Peter O'Sullevan: his race commentaries are crescendos as well judged as

Rossini's. I admire them, just as admire the crescendos of a footbe

commentator on Scottish radio called Daved Francey in his descriptions of goals at Parkhead

And talking of football on radio will all those who remember "Sports Report" please stand up, if creaking joints permit. "Sports Report" presided over by Eamonn Andrews

used to be broadcast between five

and six on Saturday afternoons, which was when I first heard H. D. (Don) Davies, "Old International" of the Manchester Guardian, who was killed in the Manchester United

detail that was beyond lesser wordsmiths. He even found time to

see what they see. Television

I have my own rule-of-thumb about commentators: if they do not

about commentators: if they do not embarrass me they must be good, regardless of their sporting knowledge, or lack of it, and regardless of their mistakes, to which they are entitled. Unlike their envious critics, in the press and out of it, I am sure I could not do their job better. I wish them — the

commentators. I mean, not the

critics - the compliments of the

MICROCOMPUTER/VIDEO COMMUNICATIONS **TECHNOLOGIST**

Appointments

A most unusual opportunity exists for someone cur-rently working with microcomputers to join an international company specialising in the production of communications software in medicine.

Ideally, he or she should be in their late twenties or early thirties and not only understand computer lan-guage and how to use it, but also be interested in applying this knowledge to applications and systems which involve both computers and video technology.

Background experience in medicine, pharmaceuticals or related fields would be a positive advantage, as would a degree in one of the life sciences. Please write, enclosing a detailed cv, to:

Dragon Medical and Scientific Communications Ltd. (for the attention of Mr J. Nurse), 8/9 Carlisle Street, London W1V 5RG.

* MISCELLANEOUS FINANCIAL

The German Reich 4% (formerly 6%)

External Loan of 1930 (The 'Match Loan')

All outstanding caruficates of the above Loan, amounting to US\$139,400 are due to be repaid at their nominal value on or after 15th January, 1983.

The certificates are payable on the conditions given in the certificates as from 15th January, 1983 at any of the offices of Skandinaviska Enskilda Banken and Gotabanken as well as at the offices of the other Paying Agents. The holder of a redeemed certificate will receive a voucher in respect of the right attaching to the certificate to receive 'Funding Bonds' when issued.

Any of the redeemed certificates held on behalf of residents Any of the received a certificates need on bensire of residents in the United Kingdom should be lodged between the hours of 11 00 am and 2.00 pm (Saturdays excepted) for Payment through a Authorised Depository in London with Lazard Brothers & Co., Limited, 21 Moorfields, London, EC2 from whom listing forms may be obtained.

Legal Appointments

LAWYERS FOR KEYAREAS OF GOVERNMENT London Appointments

The Government Legal Service offers Lawyers a unique range of career options covering virtually every aspect of the law. Current vacancies exist in the

DEPARTMENTS OF

TRADE AND INDUSTRYto provide a wide range of legal advice and services including the drafting of Bills and legal documents relating to companies, insurance and bankruptcy. consumer protection, merchant stapping, civil aviation and external trade as well as the Departments relations with both private and nationalised industries. The work involves advising on relevant EEC law and involves some foreign travel.

DEPARTMENTS OF THE

ENVIRONMENT AND TRANSPORT to undertake general advisory work on housing, rent control, local government, town and country planning, environmental protection, highways, transportation and similar topics, sometimes involving EEC law; also to draft subordinate legislation and help to prepare new regulations.

SOLICITOR'S OFFICE

OF INLAND REVENUE ,...to carry out a wide range of legal work connected

with taxes and valuations for rating, advocacy before appeals tribunals and the lower courts, inigation and structing Counsel in civil and criminal courts. Revenue work commonly involves aspects of law other than tax law; property and trust laws, company and commercial law, family law and the law of domicile are among many examples. A good grounding in general

law is important. You must be admitted (or about to be) or called in England and should preferably have recent relevant practical experience. Most appointments are at Legal Assistant level but there are some Senior Legal Assistant posts available for candidates (aged at least

27) of marked ability and potential. LEGAL ASSISTANT £8245-£14155; starting salary up to £11230 depending on age. Promotion to SLA could come after one year for those with at least 5 years previous professional experience.

SENIOR LEGAL ASSISTANT £15065-£19725; starting salary according to age, qualifications and experience.

Promotion prospects to £23420 and above. For further details and an application form (to be returned by 26 January 1983) write to Civil Service Commission, Alencon Link. Basingstoke, Hants RG21 IJB, or telephone Basingstoke (0256) 68551

High risk in raising crashed ferry

From Our Correspondent

The dangerous and delicate North Sea ferry, European Gateway, began in a force eight gale yesterday when a team of Dutch divers, two Dutch tugs and a pontoon arrived at the wreck, two miles off Felixstowe, in worsening weather con-

Salvage experts are working against the clock in a £1m attempt to save the 4,263 ton Townsend Thorensen freight ferry before winter gales break it up on the sandbank where it has been lying since it sunk two weeks ago.

Six men drowned when the ferry capsized in 30st of water, after colliding with a British

The round the clock salvage attempt is already being ham-pered by the weather. Divers sent down to examine the 200ft gash in the hull have reported that visibility underwater is less than three inches.

The tugs brought two cantilever arms which, with six others, will be welded to the ferry to form attachment points and give extra leverage for

A Dutch heavy lift vessel is expected at the scene early next. week with most of the remaining equipment. The work could take until late February. Mr Nan Halfweeg, managing director of Wijsmuller Salvage Bev, the firm undertaking the operation, said yesterday "The insurance value of the hull is. £13.6m but if we cannot save her then we won't get paid.

An added problem is that 100 tons of fuel oil is still trapped iside the hull of the ferry. The European Gateway was heading out of port with a full load when it collided with the incomning Speedlink Vanguard, and there are fears that the oil could escape and pollute miles of East

Anglian coastline.

There is a risk, too, that container lorries still chained to the deck may be torn free and hamper the salvage.

Vocal refrain: Protesters and supporters yesterday singing songs of victory after the court decision. (Photographs: Harry Kerr).

Peace protest women released on bail

By Rupert Morris

now familier routine. They were celebrating the release on bail of 44 women protesters who had been arrested on Saturday after scaling the fences of the Américan nuclear base and climbing on top of one of the huge silos due to house the controversial cruise missiles.

More than 20 women from the Greenham Common peace camp had held a candlelight vigil outside the court since the arrests were made. Yeaterdaymorning they were joined by a further 70 supporters who danced in their wellingtons and sang songs they had composed themselves, including their main theme: "You Can't Kill

the Spirit".
The crowd surged towards the court room door as it was unlocked and they were met by a barrage of police who allowed only about 25 into the court. Inside the court the peace women blew kisses to their arrested friends as they were brought up from the cells.

The 44 women, whose ages range from 17 to 73 years, were charged with trespass likely to photographers.

Supporters of the Greenham cause a breach of the peace. Common peace movement Among them were two Swedish gathered outside Newbury women, and a woman aged 62 magistrates' court, in Berkshire in the drizzle yesterday to link arms and sing songs in their women Peace Camp, Greenham Common.

They were remanded on bail until February 14, St Valentine's Day, when their supporters, many of whom packed the courtroom and waved those remains to great them.

flowers, promise to greet them with "cards and messages of peace and love". Miss Kay Jones, their counsel, applied for their release to allow for the preparation of a complicated legal argument". As each woman left the court

with a plastic bag containing personal belongings, there were cheers and emotional embraces. The oldest protester, and one of the most enthusiastic, was Mrs Nell Logan, aged 73, who said she had enjoyed the

Mrs Logan was released by police on Saturday, after her arrest. Yesterday dressed in a green plastic mackintosh, she joined a circle of peace women dancing around a banner proclaiming "Newbury women against nuclear missiles".

We are going to win," she shouted as she threw her arms in the air and posed

Miss Rebecca Johnson embracing fellow protester Mrs Nell Logan, the oldest of the group.

Letter from Moscow

Tonik and crisps join the party

in smaller letters underneath. the liquid inside fizzes satisthe liquid inside fizzes sans-factorily, but has a strange metallic taste. "Tonik" is not made by Sch... you know who, but by Rospivoprom Minpishcherprom RSFSR, which roughly translated means the Beer and Soft Drinks Subsidiary of "the Ministry of Food Production of the Russian Federated of the Russian Federated

Tonic water is at last finding its way on to the shelves of Russian shops, although so far it is more often to be found in special stores for foreigners than in the shops to which ordinary Muscovites have

access.

It is difficult to see what the market for "Tonik" might be, since no self-respecting member of the British community in Moscow would be seen dead pouring it into his or her "Dzhin", except when foreign varieties are defitsitraty (out of stock). And since "Dzhin" is almost unknown in Russia it is hard to imagine Russians mixing "Tonik" with any-

thing.
When I suggested to a
Moscow friend that he might
try putting "Tonik" with his
vodka, it took him several minutes to grasp what I meant, and then he thought I had taken leave of my senses. Vodka is not something you adulterate with anything in the Soviet Union.

Russians may, on the other hand, take to another recent innovation: crisps. Since vodka is usually drunk with snacks, such as salted herring or pickled cucumber, crisps may have a future in the

They will have to think of a snappier brand name though... "Moscow cranchy potato in bits" lacks a certain crunchy potato in bits" comes to you courtesy of the Colossus factory, which turns out to be another subsidiary of the Ministry of Food Pro-

The crisps are not salted, but no doubt that will come

The green and white label So, too, will exotic flavour; says "Tonik" in large brown but that is looking far ahead, letters, with the word "bitter" Meanwhile, Soviet crisps are not bad value at ten Kopecks (about 8p) a packet, with "Tonik" also reasonable at

Crisps and tonic water do not herald a new era of gentility in Mr Andropov's Russia, much as the leadership would welcome such a devel-

Hard drinking, as Pravid points out, brings factories and building sizes to a halt on Pridays and Mondays, in permanent times day week. On the other hand, vodka also-keeps the wheels of Soviet life-turning and induces a sort of glazed bombomic which, whencoupled with unexpected upturns in creatic food supplies, makes an otherwise

harsh life almost tolerable.

Despite the deficiencies of the food programme which Mr. Andropov inherited from Mr. Brezhnev, state shops and peasant markets have become better stocked in the past few weeks, partly to create goodwill but also to help Muscovites prepare for the new year holiday and the celebrations marking 60 years of the Soviet

At the fruit shop in the block where both Mr Brezh-nev and Mr Andropov used to live, just down the road from The Times flat, oranges, lemons and even mandarins and grapefruit made a miraculous appearance. Passers-by accosted you with a brusque "where did you get those?" and hurried off to join the long and slow-moving queue.

The important thing in Moscow is not only to have vitamin-rich foods, but to have what other people do not have. Whether it is mandaring or a foreign-made lavatory (the latest status symbol), i hints at influence beyond the something and is a bit of a normal. And if it is Western, mouthful as well. "Moscow from boots to plastic bags, so much the better.

In which case, "our" tonie and crisps may meet the same and Sch . . . you know who" may yet make inroads into the
